Cardiovascular Physiology Concepts:

Cardiovascular Physiology Concepts Richard Klabunde, 2011-11-03 Now in its second edition this highly accessible monograph lays a foundation for understanding of the underlying concepts of normal cardiovascular function. Students of medicine and related disciplines welcome the book's concise coverage as a practical partner or alternative to a more mechanistically oriented approach or an encyclopedic physiology text. A focus on well established cardiovascular principles reflects recent widely accepted research from the field. **CARDIOVASCULAR PHYSIOLOGY CONCEPTS. RICHARD E. KLABUNDE, 2021** *Cardiovascular Physiology Concepts* Richard E. Klabunde, 2020-12-01 Praised for its concise coverage this highly accessible monograph lays a foundation for understanding the underlying concepts of normal cardiovascular function and offers a welcome alternative to a more mechanistically oriented approach or an encyclopedic physiology text. Clear explanations, ample illustrations and engaging clinical cases and problems provide the perfect guidance for self directed learning and prepare you to excel in clinical practice. Current Concepts in Cardiovascular Physiology Oscar Garfein, 2012-12-02 *Current Concepts in Cardiovascular Physiology* examines seven different areas related to the field of cardiac physiology. In addition to the biochemistry and receptor pharmacology of the heart, this book explores coronary physiology, cardiovascular function and neural and reflex control of the circulation. The electrophysiology and biophysics of cardiac excitation are also considered along with humoral control of the circulation. This monograph consists of seven chapters and opens with an overview of the biochemistry of the heart with emphasis on cardiac energy metabolism and the ways in which metabolism and the biochemical pathways are controlled. The mechanisms whereby physiological events influence biochemical activities and vice versa are also discussed. The following chapters look at the chemistry and physiology of myocardial receptors, the complex interplay between the nervous and cardiovascular systems and the chemical and hormonal factors that regulate, modify and modulate the cardiovascular system. The influence of humoral, neural, intrinsic vascular and myocardial factors on coronary blood flow is also examined along with muscle mechanics, the biochemical basis of contraction, cardiac function and the factors determining the heart's electrophysiologic behavior. This text is directed primarily at clinical cardiologists, cardiovascular surgeons and trainees in their disciplines as well as internists, medical students and house officers. **Cardiovascular Physiology** Lois Jane Heller, David E. Mohrman, 1981 **Cardiovascular Physiology Concept** Hannah Ramirez, 2020-08-23 *Cardiovascular Physiology Concept* Short Book Description An Introduction to Cardiovascular Physiology provides the student with the key concepts of cardiovascular physiology. *Cardiovascular Physiology Questions for Self Assessment With Illustrated Answers* *Cardiovascular Physiology Concept* full Book Description Overview of the cardiovascular system The cardiac cycle Cardiac myocyte excitation and contraction Initiation and nervous control of heart beat Electrocardiography and arrhythmias Control of stroke volume and cardiac output Assessment of cardiac output and peripheral pulse Haemodynamics flow pressure and resistance The endothelial cell

The microcirculation and solute exchange Circulation of fluid between plasma interstitium and lymph Vascular smooth muscle excitation contraction and relaxation Control of blood vessels I Intrinsic control Control of blood vessels II Extrinsic control by nerves and hormones Specialization in individual circulations Cardiovascular receptors reflexes and central control Coordinated cardiovascular responses Cardiovascular responses in pathological situations The aim of this collection of over 230 questions is to offer students an element of self assessment as they progress through the companion book or revise for examinations Lecturers may find some of the questions useful as a template when setting questions of their own but should note that the questions are primarily educational in intent their discriminatory power has not been tested The questions are grouped under the same headings as the chapters of the companion textbook so they become progressively more advanced see Contents Occasional statements call for information from later chapters Medically relevant questions are introduced wherever they are appropriate I have set at least one question on each learning objective given at the start of the chapter in the companion volume to help you assess your achievement of the learning objectives Some questions require you to integrate information from other chapters too The questions aim to test basic understanding fundamental principles and medical relevance Hopefully they avoid excessive detail always the examiner's easy option The questions Most of the questions are multiple choice questions MCQs generally with five true false statements but occasionally more or less than five Although some educationalists now demand single correct answer questions SAQs one correct answer out of four or five options these test less knowledge so the MCQ style has been retained here To add variety there is a sprinkling of other styles of question such as extended matching questions i.e. choose the best answer from a list data interpretation problems and little numerical problems that test reasoning power and ability to do simple calculations The answers Each answer is accompanied by a brief explanation and very often an illustrative figure which should help if you got the answer wrong Most of the figures are from the accompanying textbook but there are also new explanatory diagrams after some questions It is sometimes difficult to avoid ambiguity in MCQ questions so use your common sense choose the answer that will be right most of the time rather than a remote rare possibility Nevertheless if you disagree with the official answer do let me know
