The continuous and very intense development of IT has resulted in the fast development of computer networks Computer networks as well as the entire eld of IT are subject to constant change triggered by the general technological advancement and the in uence of new IT technologies These methods and tools of designing and modeling computer networks are becoming more advanced Above all the scope of their application is growing thanks to for example the results of new research and because of new proposals of application which not long ago were not even taken into consideration These new applications stimulate the development of scienti c research as the broader application of system solutions based on computer networks results in a wide range of both theoretical and practical problems This book proves that and the contents of its chapters concern a variety of topics and issues Generally speaking the contents can be divided into several subject groups The rst group of contributions concerns new technologies applied in computer networks particularly those related to nano molecular and quantum technology

Anomaly-Detection and Health-Analysis Techniques for Core Router Systems

Shi Jin,Zhaobo Zhang,Krishnendu Chakrabarty,Xinli Gu,2019-12-19 This book tackles important problems of anomaly detection and health status analysis in complex core router systems integral to today s Internet Protocol IP networks The techniques described provide the first comprehensive set of data driven resiliency solutions for core router systems The authors present an anomaly detector for core router systems using correlation based time series analysis which monitors a set of features of a complex core router system They also describe the design of a changepoint based anomaly detector such

that anomaly detection can be adaptive to changes in the statistical features of data streams The presentation also includes a symbol based health status analyzer that first encodes as a symbol sequence the long term complex time series collected from a number of core routers and then utilizes the symbol sequence for health analysis Finally the authors describe an iterative self learning procedure for assessing the health status Enables Accurate Anomaly Detection Using Correlation Based Time Series Analysis Presents the design of a changepoint based anomaly detector Includes Hierarchical Symbol based Health Status Analysis Describes an iterative self learning procedure for assessing the health status
