Appropriate for advanced undergraduates and graduate students, it offers a detailed description of the philosophical basis for each theory along with historical context and a biography of the founder. Each chapter follows a similar format and explores the main features of the theory, including its approach to and ideas on personality development, human nature, the role of environment, the change process in therapy, and contributions and limitations to the mental health field. Theory-specific information on diagnosis, psychopharmacology, multicultural issues, spirituality, and gender issues is also discussed. These features will provide students with a deeper and more complete understanding of counseling theory than is available in any single resource and allow them to easily bridge classroom study to their future practice. This second edition of the text has been completely updated and includes more case examples as well as a new chapter on Constructivist approaches. An online instructor's manual with student resources is available and offers material to enhance the pedagogical features of the text.

Clinical Studies in Transpersonal Psychotherapy Seymour Boorstein, 1997-04-25 In this book Seymour Boorstein builds upon his classical training as a psychiatrist to show the dramatic results of blending the traditional with the transpersonal approach to psychotherapy. By providing case studies from his own practice that cover the spectrum of traditional psychological categories, he demonstrates the vast possibilities and some of the pitfalls inherent in joining psychotherapy and spirituality and also gives the reader a glimpse into the psychiatrist's mental processes as he considers patients' dilemmas and seeks to help them find solutions. The specific techniques Boorstein describes serve as guideposts for other psychotherapists and clinicians, for laypeople interested in psychological healing, and for spiritual leaders and seekers. Boorstein's message to mental health practitioners is clear: Transpersonal therapists should make use of the valuable traditional techniques that have proved useful, and traditional therapists should explore the enormous impact spiritual issues have on our lives.
