Can Traditional Chinese Medicines affect Endocrine Diseases via Effects on the Intestinal Flora? Zhoujin Tan,Xinhua Shu,Guang Chen,2024-02-08 Intestinal flora is a diversified and dynamic micro ecosystem whose structure and function have become a research hotspot in life sciences and medicine The close relationship between intestinal flora and metabolic diseases has been verified by numerous studies Traditional Chinese medicine TCM is used for disease prevention and treatment within China and is attracting attention and receiving more and more recognition from other countries all over the world Consequently the interaction of the two hotspots deserves further investigation Although TCM has been put into practice for thousands of years the study of its specific mechanism of action and related targets for the treatment of endocrine diseases is still at an exploratory stage For TCM with oral administration as the main usage the key targets of their active ingredients may be inextricably linked to the decomposition and metabolic effects of certain intestinal bacterium All these hypotheses need to be tested further
