

Kindergarten Pacing Guide

MATH	Common Core Standard	I Can...
September Number Recognition	K.CC.1 Write numbers from 0 to 20. Represent a number of objects with a written numeral 0-20 (with 0 representing a count of no objects). K.CC.2a When counting objects, say the number names in the standard order, pairing each object with one and only one number name and each number name with one and only one object. K.CC.2b Understand that the last number name said tells the number of objects counted. The number of objects is the same regardless of their arrangement or the order in which they were counted. K.CC.3 Understand that each successive number name refers to a quantity that is one larger.	I can write numbers from 0-20 and represent those numbers with a written numeral. I can say the number names in standard order when counting objects and know that one number name goes with one object. I can understand that the last number name said tells the number of objects counted, regardless of the arrangement of the objects. I can understand that each number name refers to a quantity that is one larger.
October Counting	K.CC.1 Count to 100 by ones and by tens. K.CC.2 Count forward beginning from a given number within the known sequence (instead of having to begin at 1). K.CC.3 Count to answer "how many?" questions about as many as 20 things arranged in a line, a rectangular array, or a circle, or as many as 10 things in a scattered configuration; given a number from 1-20, count out that many objects.	I can count to 100 by ones and by tens. I can count forward beginning from a given number (instead of having to begin at 1). I can count to answer "how many?" about up to 20 things arranged in a line, array, or circle, or up to 10 things scattered.
November Comparing	K.CC.4 Identify whether the number of objects in one group is greater than, less than, or equal to the number of objects in another group, e.g., by using matching and counting strategies. K.CC.5 Compare two numbers between 1 and 10 presented as written numerals.	I can identify whether the number of objects in one group is greater than, less than, or equal to the number of objects in another group. I can compare two numbers between 1 and 10 presented as numerals.

Common Core Pacing Guide Kindergarten Math 2013:

A Teacher's Guide to Using the Common Core State Standards With Mathematically Gifted and Advanced Learners

National Assoc For Gifted Children, Gail R. Ryser, Susan Assouline, 2021-09-23 A Teacher's Guide to Using the Common Core State Standards in Mathematics provides teachers and administrators with practical examples of ways to build a comprehensive coherent and continuous set of learning experiences for gifted and advanced students. It describes informal traditional off level and 21st century math assessments that are useful in making educational decisions about placement and programming. Featuring learning experiences for each grade within one math progression, the book offers insight into useful ways of both accelerating and enriching the CCSS mathematics standards. Each of the learning experiences includes a sequence of activities, implementation examples, and formative assessments. Specific instructional and management strategies for implementing the standards within the classroom, school, and school district will be helpful for both K-12 teachers and administrators.

Understanding Multiage Education Sandra J. Stone, Kathleen G. Burriss, 2019-04-30 Presenting a compelling case for changing our system of education from a graded curriculum centered approach to a multiage child centered approach, *Understanding Multiage Education* is a comprehensive exploration of the philosophy and foundations of multiage education. Veteran educators Stone and Burriss examine the why of multiage education, exploring how multiage classrooms structure environment, strategies, and assessments to unfold and complement the multiage philosophy and pedagogy. Delineating the differences between a standard and a mixed age approach, each chapter features Inside Insights, short vignettes, case studies, examples of multiage in practice, and discussion questions challenging readers to engage with the core concepts and examine how we might define success in a multiage classroom. Designed for graduate level students of early childhood, elementary, and general education courses, as well as experienced practitioners, this is an essential guide for anyone interested in understanding the rationale, implementation, and benefits of multiage education.

Getting Started with Rigorous Curriculum Design Larry Ainsworth, 2013 School districts are now successfully implementing the Rigorous Curriculum Design process to redesign their curricula to fulfill the promise of the Common Core and prepare students for success on the coming national assessments. Each chapter of *Getting Started With Rigorous Curriculum Design* will provide educators with collective wisdom, insights, and ideas to enrich and expand understandings they may not have yet come to on their own.
