Communicating Nature How We Create And Understand Environmental Messages

Phoebe Godfrey, Denise Torres

Communicating Nature How We Create And Understand Environmental Messages:

Communicating Nature Julia B. Corbett, 2006-11-06 A broader and more comprehensive understanding of how we communicate with each other about the natural world and our relationship to it is essential to solving environmental problems How do individuals develop beliefs and ideologies about the environment How do we express those beliefs through communication How are we influenced by the messages of pop culture and social institutions And how does all this communication become part of the larger social fabric of what we know as the environment *Communicating Nature* explores and explains the multiple levels of everyday communication that come together to form our perceptions of the natural world Author Julia Corbett considers all levels of communication from communication at the individual level to environmental messages transmitted by popular culture to communication generated by social institutions including political and regulatory agencies business and corporations media outlets and educational organizations The book offers a fresh and engaging introductory look at a topic of broad interest and is an important work for students of the environment activists and environmental professionals interested in understanding the cultural context of human nature interactions **The**

Routledge Handbook of Environment and Communication Anders Hansen, Robert Cox, 2015-03-05 This Handbook provides a comprehensive statement and reference point for theory research and practice with regard to environment and communication and it does this from a perspective which is both international and multi disciplinary in scope Offering comprehensive critical reviews of the history and state of the art of research into the key dimensions of environmental communication the chapters of this handbook together demonstrate the strengths of multi disciplinary and cross disciplinary approaches to understanding the centrality of communication to how the environment is constructed and indeed contested socially politically and culturally Organised in five thematic sections *The Routledge Handbook of Environment and Communication* includes contributions from internationally recognised leaders in the field The first section looks at the history and development of the discipline from a range of theoretical perspectives Section two considers the sources communicators and media professionals involved in producing environmental communication Section three examines research on news entertainment media and cultural representations of the environment The fourth section looks at the social and political implications of environmental communication with the final section discussing likely future trajectories for the field The first reference Handbook to offer a state of the art comprehensive overview of the emerging field of environmental communication research this authoritative text is a must for scholars of environmental communication across a range of disciplines including environmental studies media and communication studies cultural studies and related disciplines

Analysing Religious Discourse Stephen Pihlaja, 2021-07-08 A comprehensive introduction to all the major research approaches to religious language from a variety of linguistic perspectives *Communication and Engagement with Science and Technology* John K. Gilbert, Susan M. Stockmayer, 2012-11-27 Science communication seeks to engage individuals and

groups with evidence based information about the nature outcomes and social consequences of science and technology This text provides an overview of this burgeoning field the issues with which it deals important influences that affect it the challenges that it faces It introduces readers to the research based literature about science communication and shows how it relates to actual or potential practice A Further Exploration section provides suggestions for activities that readers might do to explore the issues raised Organized around five themes each chapter addresses a different aspect of science communication Models of science communication theory into practice Challenges in communicating science Major themes in science communication Informal learning Communication of contemporary issues in science and society Relevant for all those interested in and concerned about current issues and developments in science communication this volume is an ideal text for courses and a must have resource for faculty students and professionals in this field Systemic Crises of Global Climate Change Phoebe Godfrey, Denise Torres, 2016-04-14 Sociological literature tends to view the social categories of race class and gender as distinct and has avoided discussing how multiple intersections inform and contribute to experiences of injustice and inequity This limited focus is clearly inadequate Systemic Crises of Global Climate Change is an edited volume of 49 international interdisciplinary contributions addressing global climate change GCC by intentionally engaging with the issues of race gender and class through an intersectional lens The volume challenges and inspires readers to foster new theoretical and practical linkages and think beyond the traditional and oftentimes reductionist environmental science frame by examining issues within their turbulent political cultural and personal landscapes Varied media and writing styles invite students and educators to reflexively engage different yet complementary approaches to GCC analysis and interpretation mirroring the disparate voices and viewpoints within the field The second volume Emergent Possibilities for Sustainability will take a similar approach but will examine the possibilities for solutions as in the quest for global sustainability This book is a valuable resource for academics researchers and both undergraduate and post graduate students in the areas of Environmental Studies Climate Change Gender Studies and International studies as well as those seeking a more intersectional analysis of GCC Rhetorics, Literacies, and Narratives of Sustainability Peter N. Goggin, 2011-02-23 In this volume rhetoricians literacy scholars and humanists have come together to examine the complex discursive constructions of sustainability Touching on topics including conservation efforts in specific locales social and political constructions of rhetorical place and space community literacy historical and archival analysis of institutional politics policies and practices concerning the environment and economic growth and development town planning and zoning issues and rhetorics of environmental remediation and sustainability this collection of essays provides rhetoricians and environmentalists a window into the complex and often contradictory arena of discourse on sustainability Philosophy of Engineering and Artifact in the Digital Age Emilia Guliciuc, Viorel Guliciuc, 2010-02-19 Our world became engineered remaining nevertheless human Through the philosophy of engineering both Engineering and Philosophy are profoundly involved in the transcendental curve

of the debates on the future of humankind in the Era of the Artifacts brought by the emergent technologies of robotics genetic engineering and nanotechnology In the Era Just Before Singularity while engineering is improved by philosophy as Peter Simons has demonstrated the respected system of perplexities we call philosophy Jorge Luis Borges are encouraged by engineering This book is an anthology of papers presented during PHEADE 2009 Philosophy of Engineering and Artifact in the Digital Era www.goldenideashome.com/pheade2009 an exploratory workshop organized in the mythical county of Bucovina in the northern Romania Registered by The Reasoner as one of the first East European meetings of Philosophers and Engineers of the third millennium the event was organized by the Romanian Society for Philosophy Engineering and Technoethics in an original attempt to redefine the engineered future of the humankind

The Environment in the Age of the Internet Heike Graf, 2016-07-18 How do we talk about the environment Does this communication reveal and construct meaning Is the environment expressed and foregrounded in the new landscape of digital media The Environment in the Age of the Internet is an interdisciplinary collection that draws together research and answers from media and communication studies social sciences modern history and folklore studies Edited by Heike Graf its focus is on the communicative approaches taken by different groups to ecological issues shedding light on how these groups tell their distinctive stories of the environment This book draws on case studies from around the world and focuses on activists of radically different kinds protestors against pulp mills in South America resistance to mining in the S mi region of Sweden the struggles of indigenous peoples from the Arctic to the Amazon gardening bloggers in northern Europe and neo Nazi environmentalists in Germany Each case is examined in relation to its multifaceted media coverage mainstream and digital professional and amateur Stories are told within a context examining the what and how of these environmental stories demonstrates how contexts determine communication and how communication raises and shapes awareness These issues have never been more urgent this work never more timely The Environment in the Age of the Internet is essential reading for everyone interested in how humans relate to their environment in the digital age

Dynamics of Uncertainty, Unrest and Fragility in Europe Monika Banaś, Vesa Puuronen, 2024-12-02 This book examines some of the most pressing issues affecting contemporary societies in Europe in the 2020s namely uncertainty unrest and the fragility of individuals and groups Monika Bana Vesa Puuronen and their contributors analyse a selection of challenges affecting the present and near future of Europe and European societies They reflect on processes and events that have a pivotal impact on individual and collective life for example how the Russian invasion of Ukraine has affected reformulation or revision of such concepts as security uncertainty independence freedom democracy and democratic values as well as nation and nationalism The volume discusses phenomena such as the migration and integration of refugees media narratives on the Russian Ukrainian war political campaign rhetoric concerning the war institutional engagement in fostering civil and inclusive societies strategies of young people to cope with uncertainty in times of socio economic challenges The book offers a valuable reference for scholars and students of European

societies studying a broad scope of courses in sociology political culture intercultural communication intercultural and international relations along with political science It will also be of interest to experts and practitioners of the NGO sector active in supporting vulnerable individuals communities and societies Media and the Ecological Crisis Richard Maxwell,Jon Raundalen,Nina Lager Vestberg,2014-10-03 Media and the Ecological Crisis is a collaborative work of interdisciplinary writers engaged in mapping understanding and addressing the complex contribution of media to the current ecological crisis The book is informed by a fusion of scholarly practitioner and activist interests to inform educate and advocate for real environmentally sound changes in design policy industrial and consumer practices Aligned with an emerging area of scholarship devoted to identifying and analysing the material physical links of media technologies cultural production and environment it contributes to the project of greening media studies by raising awareness of media technology's concrete environmental effects
