Ten Cheap Lessons: Easy, Engaging Ideas for Every Secondary Classroom Tom DeRosa, 2008-01-22 Ten Cheap Lessons is not your ordinary teacher resource book. This book contains ten complete ideas that can be easily adapted for any topic in any secondary subject area. It's meant to be as easy as possible for any teacher to start using immediately. Math Games: Getting to the Core of Conceptual Understanding ebook Ted H.

Hull, Ruth Harbin Miles, 2013-04-01 Focus on the teaching and learning of mathematics through the use of games. Based on current research and correlated to College and Career Readiness and other state standards, this resource provides both teachers and students with rich opportunities to engage in the Standards for Mathematical Practice. Each concept-building game supports students' learning and understanding of concepts. Games are provided in the following categories: Counting and Cardinality, Operations and Algebraic Thinking, Expressions and Equations, Functions, Numbers and Operations in Base Ten, Numbers and Operations: Fractions, The Number System, Ratio and Proportional Relationships, Measurement and Data, Geometry, and Statistics and Probability. **Game Balance** Ian Schreiber, Brenda Romero, 2021-08-16 Within the field of

game design, game balance can best be described as a black art. It is the process by which game designers make a game simultaneously fair for players while providing them just the right amount of difficulty to be both exciting and challenging without making the game entirely predictable. This involves a combination of mathematics, psychology, and occasionally other fields such as economics and game theory. Game Balance offers readers a dynamic look into game design and player theory. Throughout the book, relevant topics on the use of spreadsheet programs will be included in each chapter. This book therefore doubles as a useful reference on Microsoft Excel, Google Spreadsheets, and other spreadsheet programs and their uses for game designers. **FEATURES** The first and only book to explore game balance as a topic in depth. Topics range from intermediate to advanced while written in an accessible style that demystifies even the most challenging mathematical concepts to the point where a novice student of game design can understand and apply them. Contains powerful spreadsheet techniques which have been tested with all major spreadsheet programs and battle-tested with real-world game design tasks. Provides short-form exercises at the end of each chapter to allow for practice of the techniques discussed therein, along with three long-term projects divided into parts throughout the book that involve their creation. Written by award-winning designers with decades of experience in the field. Ian Schreiber has been in the industry since 2000, first as a programmer and then as a game designer. He has worked on eight published game titles, training simulation games for three Fortune 500 companies, and has advised countless student projects. He is the co-founder of Global Game Jam, the largest in-person game jam event in the world. Ian has taught game design and development courses at a variety of colleges and universities since

2006 Brenda Romero is a BAFTA award winning game director entrepreneur artist and Fulbright award recipient and is presently game director and creator of the Empire of Sin franchise As a game director she has worked on 50 games and contributed to many seminal titles including the Wizardry and Jagged Alliance series and titles in the Ghost Recon Dungeons Dragons and Def Jam franchises
