Critical Education Sociomaterial Practice Environmental:

Critical Education and Sociomaterial Practice Marcia McKenzie, Andrew Bieler, 2016 Critical Education and Sociomaterial Practice presents a situated approach to learning that suggests the need for more explicit attention to sociomaterial practice in critical education. Specifically, it explores social place and narrative dimensions of practical experience as they unfold in schools, in place-based learning and teacher education contexts. Such an orientation to practice both links social and material conditions, social relations, other species, physical context, objects to human consciousness and learning, and considers the relationship between such learning and broader cultural change. The core of the book is an examination of critical situated learning undertaken through three separate empirical studies, each of which we use to elaborate a particular domain or dimension of practical experience. In turning to the sociomaterial contexts of learning, the book also underscores how social and environmental issues are necessarily linked, such as in the production of food deserts in cities or in the pollution of the drinking water in Indigenous communities through oil development. More social movements globally are connecting the dots between sexism, heteronormativity, racism, colonization, White privilege, globalization, poverty, and climate justice, including with issues of land, territory, and sovereignty, water, food, energy, and treatment and extinction of other species. As a result, categorizing some concerns as social justice or critical issues and others as environmental becomes increasingly untenable. The book thus suggests that more integrative and productive forms of critical education are needed to respond to these complex and pressing socio-ecological conditions.

New Materialisms and Environmental Education David A. G. Clarke, Jamie McPhie, 2023-07-24 New materialisms refers to a broad contemporary and significant movement of thought across the social sciences and cultural studies which attempts to return to renew or create alternative philosophies of matter. Such philosophies spring from multiple sources but are in general an attempt to bring the indissolubility of the social and environmental more forcefully into our analytical frames and modes of inquiry and tackle a perceived over-reliance on discourse and language in the so-called post-modern era of philosophy and social science. This movement in thought is underlaid by and meets up with the climate and biodiversity crises and the nature of the human condition and modes of learning or becoming within the field of environmental education. This volume brings together academics working at differing intersections of environmental education and new materialisms, highlighting tensions, knots, and lines of flight across and for research practice and theory. As such, this collection draws on multiple interpretations and streams of thought within new materialisms and demonstrates their significance for those engaging with environmental education policy practice and research. This book was originally published as a special issue of the journal *Environmental Education Research*.

The International Science and Evidence Based Education (ISEE) Assessment UNESCO MGIEP, 2022-03-22 The International Science and Evidence Based Education (ISEE) Assessment is an initiative of the UNESCO Mahatma Gandhi Institute of Education for Peace and Sustainable Development (MGIEP) and is its contribution to the Futures of Education.

process launched by UNESCO Paris in September 2019 In order to contribute to re envisioning the future of education with a science and evidence based report UNESCO MGIEP embarked on the first ever large scale assessment of knowledge of education

Practising Immanence David A. G. Clarke,2023-11-28 Practising Immanence Living with Theory and Environmental Education makes creative contributions to both qualitative inquiry and environmental education by exploring how each of these ideas seep and fuse into one another creating a space where methodology becomes pedagogy and where each of these is already always environmental indivisible with life Clarke s energising and innovative approach offers a challenge to conventional research practices and shows ways in which inquiry can be done differently Drawing on new materialisms affect theory and the practical philosophy of Gilles Deleuze and Felix Guattari the book details the PhD journey of the author merging stories and theory and stories of theory in the production of eight haecceities a philosophical concept which prioritises the thisness of a thing or event This move allows a novel methodological approach whereby the haecceities act as sites of variation on the events of the book the self as unstable and posthuman the environment as everything immanent rather than as an overly romantic or a green version of nature and the tensions that these moves create for ethical orientations in education inquiry and life in the Anthropocene Practising Immanence brings theory to life through a diffractively critical style and a unique approach to environmental pedagogic practice This radical and vitalising book will be of interest to those inspired to explore environmental problems and inquiry with each other and to those drawn to creative relational narrative embodied and post qualitative approaches to research

Researching Early Childhood Education for Sustainability Sue Elliott,Eva Ärlemalm-Hagsér,Julie Davis,2020-04-08 This book captures the now burgeoning research field of early childhood education for sustainability ECEfS and comprises insights from an ever widening and diverse pool of researchers who are promoting engaging and explaining the latest ECEfS research in the light of local national and United Nations global policy directives With the increasing urgency of global climate disruptions resource depletions and biodiversity losses alongside greater human dislocation the international scope of research and theory in this book provides a comprehensive guide to the role of sustainability in early childhood education at a time when it is needed more than ever Elliott rlemalm Hags r and Davis have brought together a collection of studies that offer new insights and approaches to ECEfS which challenge dominant narratives surrounding early childhood education and sustainability including topics such as how diverse worldviews and cultures challenge perceptions of sustainability how bold national early education policies and urgent shifts in teacher education are imperative for driving transformative practices and how ECEfS curriculum and pedagogy can be incorporated successfully into early years settings This book will both inspire researchers and more deeply enable early years educators to practise sustainability with children and so will be of great interest to scholars lecturers and researchers as well as undergraduate and postgraduate students across the increasingly intersecting fields of sustainability and early childhood education

Ethical Literacies and Education for Sustainable Development Olof Franck,Christina

Osbeck,2017-05-06 This book explores the ethical dimensions surrounding the development of education for sustainable development within schools and examines these issues through the lens of ethical literacy The book argues that teaching children to engage with nature is crucial if they are to develop a true understanding of sustainability and climate issues and claims that sustainability education is much more successful when pupils are treated as moral agents rather than being passive subjects of testing and assessment The collection brings together a range of fresh and creative perspectives on how issues around ethical literacies can be elaborated and expanded with regard to democratic sustainability education The use of children s books in teaching about sustainability is carefully explored as are the ethical and aesthetic dimensions of environmental education Including an afterword by Arjen Wals Professor of Transformative Learning for Socio Ecological Sustainability the book will be of great interest to students and researchers in the field of sustainability education

Researching Global Education Policy D. Brent Edwards Jr.,Antoni Verger,Marcia McKenzie,Keita

Takayama,2024-07-30 The movement of policy is a core feature of contemporary education reform Many different concepts including policy transfer borrowing and lending travelling diffusion and mobility have been deployed to study how and why policy moves across jurisdictions scales of governance policy sectors or organisations However the underlying theoretical perspectives and the foundational assumptions of different approaches to policy movement remain insufficiently discussed To address this gap this book places front and center questions of theory ontology epistemology and method related to policy movement It explores a wide diversity of approaches to help understand the policy movement phenomena providing a useful guide on global studies in education as well as insights into the future of this dynamic area of work Migration.

Participation and the Making of Homes Susanne Berliner,2025-07-31 This book is an ethnographic inquiry into the socio ecological relationalities in an intercultural community garden in Germany created in 2015 as a Refugees Welcome project It explores this quietly political space of civic everyday which seeks to foster care for both people and planet In three narrations the book offers power critical reflections on social encounters participation in equalities and home making In innovative ways the narrations also shed light on how people s doings are entangled with the more than human plants soils animals water and more Migration Participation and the Making of Homes increases our understanding of how communities navigate social heterogeneity and how people with refugee biographies shape their surroundings as active agents The narrations show that a cosmopolitan spirit is alive in this garden and the plants play a significant part in its expression Yet while the garden works as a retreat from hostilities that people may experience outside it also remains a racialised space Power relations work in complex ways positioning individuals as not belonging where conflicts occur At the same time in instances less shaped by the local habitus new dynamics develop between guest and host The narrations demonstrate how all people in the garden are engaged in unique home making processes and in the making of the shared home which is the garden The gardeners connect in the joy of tending and watching life grow as the plants speak in their own way about vital continuity Contributing to the

social scientific exploration of the dynamics of migration belonging and community making in pluralistic societies this book takes a transdisciplinary shape entering into dialogue with literature from various fields As such it will be of interest for researchers and university students of all levels in the areas of sociology education social work anthropology environmental studies political science and related fields This book will also be useful for civil organisations working in refugee support and or integration policymakers and local governments

Critical, Transdisciplinary and Embodied Approaches in STEM Education Pratim Sengupta, Marie-Claire Shanahan, Beaumie Kim, 2019-12-16 Over the past decade integrated STEM education research has emerged as an international concern creating around it an imperative for technological and disciplinary innovation and a global resurgence of interest in teaching and learning to code at the K 16 levels At the same time issues of democratization equity power and access including recent decolonizing efforts in public education are also beginning to be acknowledged as legitimate issues in STEM education Taking a reflexive approach to the intersection of these concerns this book presents a collection of papers making new theoretical advances addressing two broad themes Transdisciplinary Approaches in STEM Education and Bodies Hegemony and Decolonization in STEM Education Within each theme praxis is of central concern including analyses of teaching and learning that re imagines disciplinary boundaries and domains the relationship between Art and STEM and the design of learning technologies spaces and environments In addition to graduate research seminars at the Masters and PhD levels in Learning Sciences Science Education Educational Technology and STEM education this book could also serve as a textbook for graduate and pre service teacher education courses
