Cross Cultural Trade In World History Studies In Comparative World History:

Cross-Cultural Trade in World History Philip D. Curtin, 1984-05-25 The trade between peoples of different cultures from the ancient world to the commercial revolution **Cross-cultural Trade in World History** Philip D. Curtin, 1986

Cross-cultural Trade in World History Philip D. Curtin, 1992 *Architects of World History* Kenneth R. Curtis, Jerry H. Bentley, 2014-02-05 Architects of World History presents an innovative collection of original essays by leading scholars associated with World History exploring through intellectual autobiography the ideas challenges and inspirations that are shaping the field Features original accessible contributions from pioneering scholars in the field Offers insights into the process of developing a workable world history research topic and the experience of professional life as a world historian Points to methodological challenges the scholar's current research agenda in relation to the development of world history and future directions anticipated for key areas within world history **The Small Worlds of Corporate Governance**

Bruce Kogut, 2012-05-11 An empirically rich study of the influence of social networks on corporate governance across countries and the emergence of a new transnational community The financial crisis of 2008 laid bare the hidden network of relationships in corporate governance who owes what to whom who will stand by whom in times of crisis what governs the provision of credit when no one seems to have credit This book maps the influence of these types of economic and social networks communities of agents people or firms and the ties among them on corporate behavior and governance The empirically rich studies in the book are largely concerned with mechanisms for the emergence of governance networks rather than with what determines the best outcomes The chapters identify structural breaks privatization for example or globalization and assess why powerful actors across countries behaved similarly or differently in terms of network properties and corporate governance The chapters examine among other topics the surprisingly heterogeneous network structures that contradict the common belief in a single Anglo Saxon model the variation in network trajectories among the formerly communist countries including China signs of convergence in response to the common structural breaks in Europe the growing structural power of women due to gains in gender diversity on corporate governance in Scandinavia the small world of merger and acquisition activity in Germany and the United States the properties of a global and transnational governance network and application of agent based models to understanding the emergence of governance *Trading Conflicts* Georg Christ, 2012-01-20 Based on Mamluk and Venetian sources this book offers a thorough analysis of the various conflicts arising around Levant trade It demonstrates how these conflicts more often than not cut across cultural divides in Late Medieval Mamluk Alexandria **Global History, Globally** Sven Beckert, Dominic Sachsenmaier, 2018-02-22 In recent years historians in many different parts of the world have sought to transnationalize and globalize their perspectives on the past Despite all these efforts to gain new global historical visions however the debates surrounding this movement have remained rather provincial in scope Global History Globally addresses this lacuna by surveying the state of global history in different world

regions Divided into three distinct but tightly interweaved sections the book s chapters provide regional surveys of the practice of global history on all continents review some of the research in four core fields of global history and consider a number of problems that global historians have contended with in their work The authors hail from various world regions and are themselves leading global historians Collectively they provide an unprecedented survey of what today is the most dynamic field in the discipline of history As one of the first books to systematically discuss the international dimensions of global historical scholarship and address a wealth of questions emanating from them Global History Globally is a must read book for all students and scholars of global history From House Societies to States Juan Carlos Moreno

Garcia,2022-10-21 The organization and characteristics of early and ancient states have become the focus of a renewed interest from archaeologists ancient historians and anthropologists in recent years On the one hand neo evolutionary schemas of political transformation find it difficult to define some of their most basic concepts such as chiefdom complex chiefdom and state not to mention the transition between them On the other hand teleological interpretations based on linear dynamics from less to increasingly more complex political structures in successive steps impose biased and too rigid views on the available evidence In fact recent research stresses the existence of other forms of socio political organization less vertically integrated and more heterarchical that proved highly successful and resilient in the long term in tying together social groups What is more such forms quite often represented the basic blocks on which states were built and that managed to survive once states collapsed Finally nomadic maritime and mountain populations provide fascinating examples of societies that experienced alternative forms of political organization sometimes on a seasonal basis In other cases their consideration as marginal populations that cultivated specialized skills ensured them a certain degree of autonomy when living either within or at the borders of states This book explores such small scale socio political organizations their potential and the historical trajectories they stimulated A selection of historical case studies from different regions of the world may help rethink current concepts and views about the emergence and organization of political complexity and the mechanisms that prevented occasionally the emergence of solid polities They may also cast some light over trajectories of historical transformation still poorly understood as are the limits of effective state power This book explores the importance of comparative research and long term historical perspectives to avoid simplistic interpretations based on the characteristics of modern Western states abusively used retrospectively **The Armenian Diaspora and Stateless Power** Talar

Chahinian,Sossie Kasbarian,Tsolin Nalbantian,2023-11-02 From genocide forced displacement and emigration to the gradual establishment of sedentary and rooted global communities how has the Armenian diaspora formed and maintained a sense of collective identity This book explores the richness and magnitude of the Armenian experience through the 20th century to examine how Armenian diaspora elites and their institutions emerged in the post genocide period and used stateless power to compose forms of social discipline Historians cultural theorists literary critics sociologists political scientists and

anthropologists explore how national and transnational institutions were built in far flung sites from Istanbul Aleppo Beirut and Jerusalem to Paris Los Angeles and the American mid west Exploring literary and cultural production as well as the role of religious institutions the book probes the history and experience of the Armenian diaspora through the long 20th century from the role of the fin de si cle migr Armenian press to the experience of Syrian Armenian asylum seekers in the 21st century It shows that a diaspora s statelessness can not only be evidence of its power but also how this stateless power acts as an alternative and complement to the nation state

The Materiality of Color Andrea Feeser, 2017-07-05 Although much has been written on the aesthetic value of color there are other values that adhere to it with economic and social values among them Through case studies of particular colors and colored objects this volume demonstrates just how complex the history of color is by focusing on the diverse social and cultural meanings of color the trouble pain and suffering behind the production and application of these colors the difficult technical processes for making and applying color and the intricacy of commercial exchanges and knowledge transfers as commodities and techniques moved from one region to another By emphasizing color s materiality the way in which it was produced exchanged and used by artisans artists and craftspeople contributors draw attention to the disjuncture between the beauty of color and the blood sweat and tears that went into its production circulation and application as well as to the complicated and varied social meanings attached to color within specific historical and social contexts This book captures color s global history with chapters on indigo plantations in India and the American South cochineal production in colonial Oaxaca the taste for brightly colored Chinese objects in Europe and the thriving trade in vermilion between Europeans and Native Americans To underscore the complexity of the technical knowledge behind color production there are chapters on the discovery of Prussian blue Brazilian feather techn and wallpaper production To sound the depths of color s capacity for social and cultural meaning making there are chapters that explore the significance of black ink in Shakespeare s sonnets red threads in women s needlework samplers blues in Mayan sacred statuary and greens and yellows in colored glass bracelets that were traded across the Arabian desert in the late Middle Ages The purpose of this book is to recover color s complex and sometimes morally troubling past and in doing so
