Crossing The Great Divide Worker Risk And Opportunity In The New Economy:

Crossing the Great Divide Vicki Smith, 2002 Vicki Smith analyzes this shift asking how workers navigated their way across the divide between bad jobs and good jobs between bad jobs organized hierarchically and jobs requiring greater worker involvement and between temporary and stable work **Community College Faculty** J. Levin, S. Kater, 2006-01-31 John S Levin Susan T Kater and Richard L Wagoner collectively argue that as community colleges organize themselves to respond to economic needs and employer demands and as they rely more heavily upon workplace efficiencies such as part time labor they turn themselves into businesses or corporations and threaten their social and educational mission **The End of Burnout** Jonathan Malesic, 2022-01-04 Going beyond the how and why of burnout a former tenured professor combines academic methods and first person experience to propose new ways for resisting our cultural obsession with work Through research on the science culture and philosophy of burnout Malesic explores the gap between our vocation and our jobs and between the ideals we have for work and the reality of what we have to do **Class Questions** Joan Acker, 2006 Class Questions Feminist Answers examines feminist theories of class and intersectionality and proposes a theory of gendered and racialized class processes as deeply embedded in capitalist practices both historically and today Joan Acker argues that large work organizations are primary locations in which gendered and racialized class inequalities are created As neo liberal market practices reorganize work gendered and racialized class inequalities are both reorganized and increasing nationally and globally This book will appeal to readers interested in a feminist discussion of class as a racialized and gendered process intimately tied to the capitalist economic system **The Stigma Trap** Ofer Sharone, 2024 After receiving a PhD in mathematics from MIT Larry spent three decades working in the tech industry most recently in the area of speech recognition And today in his late fifties and after a prolonged bout of unemployment Larry is a cashier at a department store earning just above the minimum wage Are you wondering how with a degree from MIT and all that experience Larry couldn't find a job any job in tech **The Oxford Handbook of Identities in Organizations** Andrew D. Brown, 2020-01-09 Conceived as the meanings that individuals attach to their selves a substantial stockpile of theory related to identities accumulated across the arts social sciences and humanities over many decades continues to nourish contemporary research on self identities in organizations In times which are more reflexive narcissistic and fluid the identities of participants in organizations are increasingly less fixed and less certain making identity issues both more salient and more interesting Particular attention has been given to processes of identity construction often styled identity work Research has focused on how why and when such processes occur and their implications for organizing and individual group and organizational outcomes This has resulted in a burgeoning stream of research from discursive dramaturgical symbolic socio cognitive and psychodynamic perspectives that most often casts individuals efforts to fabricate identities as intentional relational and consequential Seemingly intractable debates centred on the nature of identities their relative stability or fluidity whether

they are best regarded as coherent or fractured positive or not and how they are fabricated within relations of power combined with other conceptual issues continue to invigorate the field However these debates have also led to some scepticism regarding the future potential of identities research Yet as the chapters in this Handbook demonstrate there are considerable grounds for optimism that identity as root metaphor nexus concept and means to bridge levels of analysis has significant potential to generate multiple compelling streams of theorizing in organization and management studies

Sociology of Work Vicki Smith, 2013-05-16 The simple act of going to work every day is an integral part of all societies across the globe It is an ingrained social contract we all work to survive But it goes beyond physical survival Psychologists have equated losing a job with the trauma of divorce or a family death and enormous issues arise from financial panic to sinking self esteem Through work we build our self identity our lifestyle and our aspirations How did it come about that work dominates so many parts of our lives and our psyche This multi disciplinary encyclopedia covers curricular subjects that seek to address that question ranging from business and management to anthropology sociology social history psychology politics economics and health Features Benefits International and comparative coverage 335 signed entries A to Z fill 2 volumes in print and electronic formats Cross References and Suggestions for Further Readings guide readers to additional resources A Chronology provides students with historical perspective of the sociology of work In the electronic version the comprehensive Index combines with the Cross References and thematic Reader s Guide themes to provide robust search and browse capabilities

Race, Identity and Work Ethel L. Mickey, Adia Harvey Wingfield, 2018-10-29 This volume examines the connections between race and work focusing how racial minorities deal with identity in the workplace how workers of color encounter exclusion marginalization and sidelining and strategies minority workers use to combat and change patterns of workplace inequality
