China, Russia, and Twenty-first Century Global Geopolitics Paul J. Bolt, Sharyl Cross, 2018 This book provides a comprehensive analysis of the Chinese Russian bilateral relationship grounded in a historical perspective and discusses the implications of the burgeoning strategic partnership between these two major powers for world order and global geopolitics The volume compares the national worldviews priorities and strategic visions for the Chinese and Russian leadership examining several aspects of the relationship in detail The energy trade is the most important component of economic ties although both sides desire to broaden trade and investments In the military realm Russia sells advanced arms to China and the two countries engage in regular joint exercises Diplomatically these two Eurasian powers take similar approaches to conflicts in Ukraine and Syria and also cooperate on non traditional security issues including preventing coloured revolutions cyber management and terrorism These issue areas illustrate four themes Russia and China have common interests that cement their partnership including security protecting authoritarian institutions and re shaping aspects of the global order They are key players not only influencing regional issues but also

international norms and institutions The Sino Russian partnership presents a potential counterbalance to the United States and democratic nations in shaping the contemporary and emerging geopolitical landscape Nevertheless the West is still an important partner for China and Russia Both seek better relations with the West but on the basis of mutual respect and equality Lastly Russia and China have frictions in their relationship and not all of their interests overlap The Sino Russian relationship has gained considerable momentum particularly since 2014 as Moscow turned to Beijing attempting to offset tensions with the West in the aftermath of Russia s annexation of Crimea and intervention in Ukraine However so far China and Russia describe their relationship as a comprehensive strategic partnership but they are not allies **Privatizing**

Sabre Rattling in Space Ahmad Khan, Eligar Sadeh, 2024-12-13 This book offers historical and theoretical context of the path followed by States from space militarization to weaponization and deconstructs traditional security paradigm myths to prove that a paradigm shift has been brought because of deadly space weapons developed by major space powers It reconciles that the strategic distrust between two leading space competitors U S and China has prompted them to pursue counter space capabilities The ripple effect of this troubling relation in space is not limited at the global level but has witnessed a trickledown effect on regional security In relation to this the book offers details of the Indian space program including its military space ambitions and provides information about Pakistan s objectives in space It offers an overview of challenges to international space governance and how the structural flaws help states to aggressively follow a

path toward space weaponization. Additionally, it discusses the UN negotiating arms control measures in space and the politics of states not to negotiate prevention of an arms race in outer space.
