

CRS 3000... the most compact food service register with a multi-line operator screen designed for quick service restaurants.

Low Profile, Space Saving Design

The attractive and compact CRS 3000 will complement any food service counter. About the size of a legal size pad and less than six inches high, the CRS 3000 will use only about one half the counter space of other quick service systems.

Eight Line Operator Screen

With an eight line, forty character screen, fast data operations are productive immediately. The items you enter appear on the screen for easy checking and confirmation for what you too to select your items.

Fast Training For New Employees

Training is fast with the eight line operator display. Pop-up windows insure that you offer the right choices for each item. In addition, a "training mode" allows hands-on practice without disrupting actual cash business.

Large Flexible Keyboard

The 120 key position keyboard is completely programmable to your specific menu and operation requirements. Five levels are available for different menus. If your menu is large, you can use pop-up windows to list condiments, toppings, or flavors on the screen, leaving keyboard space free for other menu items or functions.

Fast, Accurate Order Entry

With CRS's unique pop-up screens, you can automatically display selections for condiments, toppings, or flavors after you enter an item. Your operator can easily help your customer with their order, selecting only from the choices available, at the correct size or flavor, and at the correct price. Plus, you can use pop-up windows to prompt your operators to "suggestive sell" additional items.

Quick, Easy Menu Maintenance

Changing prices or adding new items? CRS 3000 programming systems are simple, direct and easy to follow. You simply enter changes by typing on the keyboard using a special keyboard overlay.

Programmable Display Keys Provide Flexibility For Fast Order Throughput and Transaction Control

The CRS 3000 Table Look-Up function conserves keyboard space. Now you don't need to have a large confusing keyboard to meet your customer's order. Each key on the CRS 3000 can be programmed to display up to seven function keys or menu items. For example, one key can be simply labeled "Manager." Using a special key the manager can access up to seven functions from that keyboard location. This provides six additional keyboard locations for menu items or other functions. And since there are five levels on the CRS 3000 system, these manager functions can actually be completely hidden off the keyboard.

Large complex menus can be simplified with the table look-up function too. For example, one key can be labeled "pasta." When the operator depresses "pasta" up to seven choices can be displayed. Only CRS offers simplicity in a compact package that also provides the detailed security needed to operate your restaurant.
