Helen M. I. Osborn,Tariq H. Khan,2000 Introduction 2 **Introduction to Green Chemistry** John Andraos,Albert S. Matlack,2022-03-09 Interest in green chemistry and clean processes has grown so much in recent years that topics such as fluororous biphasic catalysis metal organic frameworks and process intensification which were barely mentioned in the First Edition have become major areas of research In addition government funding has ramped up the development of fuel cells and biofuels This reflects the evolving focus from pollution remediation to pollution prevention Copiously illustrated with more than 800 figures the Third Edition provides an update from the frontiers of the field It features supplementary exercises at the end of each chapter relevant to the chemical examples introduced in each chapter Particular attention is paid to a new concluding chapter on the use of green metrics as an objective tool to demonstrate proof of synthesis plan efficiency and to identify where further improvements can be made through fully worked examples relevant to the chemical industry NEW AND EXPANDED RESEARCH TOPICS Metal organic frameworks Metrics Solid acids for alkylation of isobutene by butanes Carbon molecular sieves Mixed micro and mesoporous solids Organocatalysis Process intensification and gas phase enzymatic reactions Hydrogen storage for fuel cells Reactive distillation Catalysts in action on an atomic scale UPDATED AND EXPANDED CURRENT EVENTS TOPICS Industry resistance to inherently safer chemistry Nuclear power Removal of mercury from vaccines Removal of mercury and lead from primary explosives Biofuels Uses for surplus glycerol New hard materials to reduce wear Electronic waste Smart growth The book covers traditional green chemistry topics including catalysis benign solvents and alternative feedstocks It also discusses relevant but less frequently covered topics with chapters such as Chemistry of Long Wear and Population and the Environment This coverage highlights the importance of chemistry to everyday life and demonstrates the benefits the expanded exploitation of green chemistry can have for society

Introduction to Green Chemistry Albert Matlack,2010-04-05 The book covers traditional green chemistry topics including catalysis benign solvents and alternative feedstocks It also discusses relevant but less frequently covered topics with chapters such as Chemistry of Longer Wear and Population and the Environment This coverage highlights the importance of

chemistry to everyday life and demonstrates the benefits the expanded exploitation of green chemistry can have for society. Copiously illustrated with over 800 figures, this second edition provides an update from the frontiers of the field.

Polymeric Materials in Organic Synthesis and Catalysis Michael R. Buchmeiser, 2006-03-06 This is the first book to describe the synthesis and characterization of the materials used in polymer supported synthesis. The authors cover not only the classical polymers and their use in homogeneous, heterogeneous and micellar catalysis but also such new developments as enzyme labile linkers illustrating how to simplify the purification process and avoid waste. The result is a wealth of useful information for beginners and experts alike in one handy reference removing the need for difficult and time consuming research among the literature.

Two-Dimensional X-Ray Diffraction Bob B. He, 2011-09-20 Written by one of the pioneers of 2D X Ray Diffraction, this useful guide covers the fundamentals, experimental methods and applications of two dimensional x ray diffraction including geometry, convention, x ray source and optics, two dimensional detectors, diffraction data interpretation and configurations for various applications such as phase identification, texture, stress, microstructure analysis, crystallinity, thin film analysis and combinatorial screening. Experimental examples in materials research, pharmaceuticals and forensics are also given. This presents a key resource to researchers in materials science, chemistry, physics and pharmaceuticals as well as graduate level students in these areas.
