Critical Care Ethics Treatment Decisions In American Hospitals:

Critical Care Ethics David F. Kelly, 2002-06-11 In *Critical Care Ethics* David F Kelly describes and analyzes some of the major ethical issues facing American hospitals today and proposes practical approaches by which hospitals may ethically and legally resolve them The author includes both theory and application in a way which insures accessibility to those without a background in moral philosophy or moral theology The book's major emphasis is on the resolution within the American hospital of the practical question of forgoing treatment Its central thesis is that a consensus has arisen in American medical ethics concerning the ethical and legal rightness of forgoing medical treatment in some circumstances The present consensus is based on three pillars The first two of these are ethical principles and distinctions arising from Catholic medical ethics which have been generally accepted in American hospital ethics and American law The third is the development of American law itself Together these three bases have resulted in general agreement that Americans have the right to refuse treatment for themselves and that with some reservations they have the right to forgo treatment for others as well These issues are developed in detail including application to the question of medical nutrition and analysis of the decision In addition there are chapters on pain management ethics committees and the problems of resource allocation The final chapter attempts to point out some of the difficulties inherent in allocation arguments and criticizes the way in which they are so often made by many ethicists and religious leaders

End-of-Life Communication in the ICU David W. Crippen, 2007-11-27 Talking to patients and their families about end of life issues can be difficult and stressful This book looks at ways different cultures view death and then further explores how health care providers around the world communicate about such sensitive issues as withholding or withdrawing life support and discussing options when the outcome is uncertain By offering a better understanding of cultural differences in attitudes about death and methods of communications about end of life issues the coverage in this important book helps prepare healthcare practitioners to be better communicators both within and outside of their own cultures

Kuczewski, Rosa Lynn B. Pinkus, 1999-04-22 This collection of thirty one cases and commentaries addresses ethical problems commonly encountered by the average health care professional not just those working on such high tech specialties as organ transplants or genetic engineering It deals with familiar issues that are rarely considered in ethics casebooks including such fundamental matters as informed consent patient decision making capacity the role of the family and end of life decisions It also provides resources for basic but neglected ethical issues involving placement decisions for elderly or technologically dependent patients rehabilitation care confidentiality regarding AIDS professional responsibility and organizational and institutional ethics The authors describe in detail the perspectives of each party to the case the kind of language that ethicists use to discuss the issues and the outcome of the case A short bibliography suggests useful articles for further reading or curriculum development Easily understood by readers with no prior training in ethics this book offers guidance on everyday problems from across the broad continuum of care It will be valuable for health care professionals hospital ethics committees and for students preparing for careers in health care professions **Current Catalog** National Library of Medicine (U.S.), 1993 First multi year cumulation covers six years 1965 70 **Christian Ethics** Stivers, Laura, A., Martin-Schramm, James B., 2020-08-15 The fifth edition of this classic introduction to Christian ethics via the case method approach utilizing case studies of contemporary ethical issues

Allocating Scarce Medical Resources H. Tristram Engelhardt Jr., Mark J. Cherry, 2002-05-20 Roman Catholic moral

theology is the point of departure for this multifaceted exploration of the challenge of allocating scarce medical resources. The volume begins its exploration of discerning moral limits to modern high technology medicine with a consensus statement born of the conversations among its contributors. The seventeen essays use the example of critical care because it offers one of the few areas in medicine where there are good clinical predictive measures regarding the likelihood of survival. As a result, the health care industry can with increasing accuracy predict the probability of saving lives and at what cost. Because critical care involves hard choices in the face of finitude, it invites profound questions about the meaning of life, the nature of a good death, and distributive justice. For those who identify the prize of human life as immortality, the question arises as to how much effort should be invested in marginally postponing death. In a secular culture that presumes that individuals live only once and briefly, there is an often unacknowledged moral imperative to employ any means necessary to postpone death. The conflict between the free choice of individuals and various aspirations to equality compounds the challenge of controlling medical costs while also offering high tech care to those who want its possible benefits. It forces society to confront anew notions of ordinary versus extraordinary and proportionate versus disproportionate treatment in a highly technologically structured social context. This cluster of discussions is enriched by five essays from Jewish, Orthodox, Christian, and Protestant perspectives. Written by premier scholars from the United States and abroad, these essays will be valuable reading for students and scholars of bioethics and Christian moral theology.
