Critical Security In The Asia Pacific New Approaches To Conflict Analysis Mup:

Critical security in the Asia-Pacific Anthony Burke, Matt McDonald, 2021-06-15 In the wake of 9 11 the Asian crisis and the 2004 tsunami traditional analytical frameworks are increasingly unable to explain how individuals and communities are rendered insecure or advance individual global or environmental security In the Asia Pacific the accepted wisdom of realism has meant that analyses rarely move beyond the statist militarist and exclusionary assumptions that underpin traditional realpolitik This innovative new book challenges these limitations and addresses the missing problems people and vulnerabilities of the Asia Pacific region It also turns a critical eye on traditional interstate strategic dynamics Critical security in the Asia Pacific applies both a critical theoretical approach that interrogates the deeper assumptions underpinning security discourses and a human centred policy approach that focuses on the security welfare and emancipation of individuals and communities Leading Asia Pacific researchers combine to apply these frameworks to the most pressing issues in the region from the Korean peninsula to environmental change Indonesian conflict the war on terror and the plight of refugees The result is a sophisticated and accessible account of often neglected realities of marginalization in the region and a compelling argument for the empowerment and security of the most vulnerable **New Approaches to Human Security in the Asia-Pacific** William T. Tow, 2013 **Peace and Security in the Asia-Pacific** Sorpong Peou, 2010-04-15 Demonstrating that none of the various perspectives under review has emerged as the clear winner in the struggle for theoretical hegemony in security studies this book shows that eclectic perspectives like democratic realist institutionalism can better explain peace and security in the Asian Pacific The Asian Pacific has emerged as one of the most important regions in the world causing scholars to pay increased attention to the various challenges old and new to peace and security there Peace and Security in the Asia Pacific Theory and Practice is a comprehensive critical review of the established theoretical perspectives relevant to contemporary peace and security studies in the light of recent experiences Illuminating ongoing debates in the field the book covers some 20 theoretical perspectives on peace and security in the Asian Pacific including realist liberal socialist peace and human security constructivist feminist and nontraditional security studies The first section of the book discusses perspectives in realist security studies the second part covers perspectives critical of realism The author's goal is to assess whether any of the perspectives found in nonrealist security studies are capable of undermining realism His conclusion is that each theoretical perspective has its strengths and weaknesses leaving eclecticism as the best way to understand the region's dynamics Regional Security in the Asia Pacific Marika Vicziany, David P. Wright-Neville, Peter Lentini, 2004-03-25 The September 2001 terrorist attacks shocked the world But what did they change In this book Asia specialists from academe and policy think tanks assess the impact of 9 11 on the Asia Pacific Drawing on unique fieldwork access to a wide range of documents and inside expertise the authors consider how old geo strategic and cultural fault lines have been overlaid with new security threats from state and non state actors With chapters on specific

countries and regions defense policies terrorism and current and potential conflict zones this collection critically examines the Asia Pacific region s post 9 11 as well as post Iraq war security architecture **New Approaches to Regional Security** Joseph A. Camilleri,Pax Christi International,1991 **Asia-Pacific Security** Joanne Wallis,Andrew Carr,2016-10-01 This new textbook gathers an international roster of top security studies scholars to provide an overview of Asia Pacific s international relations and pressing contemporary security issues It is a suitable introduction for undergraduate and masters students use in international relations and security studies courses Merging a strong theoretical component with rich contemporary and historical empirical examples Asia Pacific Security examines the region s key players and challenges as well as a spectrum of proposed solutions for improving regional stability Major topics include in depth looks at the United States relationship with China Security concerns presented by small and microstates the region s largest group of nations threats posed by terrorism and insurgency the region s accelerating arms race and the potential for an Asian war the possible roles of multilateralism security communities and human security as part of solutions to regional problems *The New Security Agenda in the Asia-Pacific Region* Denny Roy,2016-07-27 The field of security studies is undergoing a major re evaluation in the post Cold War era and this has important implications for the region The security dangers of the 1990s and beyond are different and more complex than those of the Cold War and strategic thinkers both in the academic and policy making spheres must begin to understand the new environment lest they fall into the old trap of planning for the next conflict based on the conditions of the last conflict This book is designed to survey the new environment assessing what has changed and what remains the same and suggesting what types of demands future strategists will face Asia-Pacific Strategic Relations William T. Tow,2002-01-07 Arguing for a strategy that promises to achieve greater regional stability this overview of security relations in the Asia Pacific finds that current approaches by policy makers increase the likelihood of conflict Instead it proposes that a strategy of convergent security be adopted to build an enduring regional security framework As a concise survey of key approaches to international relations the volume considers relevant historical and contemporary empirical issues as well The authoritative and broad ranging survey is designed for a wide range of analysts and students of Asian politics and strategy *Peace and Security in Indo-Pacific Asia* Sorpong Peou,2021-11-21 Peace and Security in Indo Pacific Asia is for the informed the interested and the engaged Sorpong Peou brings together the skills of the pedagogue with the knowledge of the scholar Dr David Dewitt University Professor Emeritus Senior Scholar York University Toronto Canada Peou s excellent book provides both the lay reader and the specialist with six important theoretical frameworks which should provide the basis for better appreciation of what a security community in Indo Pacific Asia means in our world today There are very few scholars who understand the region like Peou Dr W Andy Knight Professor of Political Science the University of Alberta Canada Sorpong Peou s extraordinary breadth of knowledge of both International Relations theory and the key trends in Indo Pacific Asia shines through in this authoritative analysis Dr Richard Stubbs Professor of Political Science

McMaster University Canada A pedagogical approach of the textbook that is appreciated is how the author respectfully engages with the theories of IR and is not pushing an agenda of denouncing some theories and trying to persuade the reader of others We live in such polarizing times that it is truly refreshing to read scholarly work that avoids sensationalistic attacks on theories that have been debated for decades Each theory in this manuscript is explored on its own terms and the reader is encouraged to figure out where they stand on these enduring debates in the context of Indo Pacific security The approach will lead to compelling classroom discussions of the theories and the politics of the region This book is a must read for any student or observer of security trends in the region Dr Mark Williams Chair and Professor of Political Studies Vancouver Island University B C Canada

Asia Pacific Security Leszek Buszynski, 2014 This new title from Routledge edited by Professor Leszek Buszynski includes the key literature on Asia Pacific Security Arranged across four volumes the collection covers China the United States Japan and South Korea as well as peripheral players such as Australia and India It explores in depth trouble spots and potential flashpoints for example Taiwan and the Korean Peninsula It also brings together the major works on regional security architecture and non traditional security
