Abstract – The dichotomy between what to think and how to think and also making every attempt to monitor one's thinking and thoughts has been heeded much by scholars and educators. The abilities to reflect on our thinking processes, making sound decisions, and being logical are some conspicuous characteristics of critical thinking. This article attempted to establish critical thinking skills in TEFL students through providing them with some short stories to read. To this aim, through a sample TOEFL test of reading comprehension, 40 homogeneous students were selected out of 93 and randomly divided into two groups of 20: a control and an experimental group. After a two-month treatment period, the results of the study revealed that the students in the experimental group outperformed their counterparts in the control group. Thus, reading short stories made suitable tools for achieving critical thinking skills. The study came up with such a fact that short stories can establish critical thinking skills. Therefore, they are required to be included in the educational curriculum.

Keywords – Critical Thinking Skills; Short Stories.

1. Introduction

To afford students opportunities to achieve critical thinking skills is an educational responsibility that educators should take. Educationally viewing the case, critical thinking skills can cause students to develop intellectually. It is something that is of great benefits to the educational systems. Through such skills, students feel free to discover and get engaged in the process of learning in general and language learning in particular. Short stories are thought suitable tools to establish critical thinking skills in students. In short stories, students should take a critical stance toward them, ask questions, make judgments and so on. According to the aspects of critical thinking, it should be stated that critical thinking is a productive and positive activity, a process not an outcome, its manifestations vary according to the contexts in which it occurs, it is triggered by positive as well as negative events, and it is emotive as well as rational. To mention the components of critical thinking, it is to be pointed out that identifying and challenging assumptions are central to critical thinking. In critical thinking, challenging the importance of context is crucial. Critical thinkers try to imagine and explore alternatives which lead to reflective skepticism [6]. In line with Brookfield's components, a critical thinker can make

effective use of identifying, challenging, imagining, and exploring tools to create meanings out of literary short stories. Since critical thinking prepares students to act individually and sometimes in groups and lowers the stress and tension that some students may have, it is also dealt with in the humanistic education. In this paradigm of thought, students are left to explore the knowledge, make logical connections between the events, behave reasonably rather than take in blindly the knowledge emitting from their teachers. This article endeavors to provide some short stories as tools for students to achieve critical thinking skills. Thus, three hypotheses are raised in the study and they are as follows:

1. There is no relationship between short stories and critical thinking skills.
2. Short stories can establish critical thinking skills in TEFL students.
3. Short stories cannot establish critical thinking skills in TEFL students.

2. Theoretical Background

Critical thinking is defined as logical, analytical, reasonable, higher-order, reflective, and scientific thinking
