Critique Destruction Cr Atrice Production Humanisme:

Philosophies of Technologies Valerie Charolles, Elise Lamy-Rested, 2024-05-29 In the space of a century technologies have acquired unprecedented power The result of these developments is a new form of the world These transformations test our capacities and generate new crises with multiple issues at stake Drawing on the lessons of a long history Philosophies of Technologies examines the continuities and disruptions brought about by the power of contemporary technical systems without reducing them to the digital age It draws together 13 authors from different schools of thought and proposes tools that combine productive technology with sustainability innovation and responsibility This book wagers that in the face of the sprawling and ever changing deployment of technologies philosophy is able to respond to the changes that offer so many opportunities to shape our future Today technologies need a philosophical moment

Digital Conquest Fanny Lopez, Cécile Diguët, 2025-07-31 In an era of exponential digital growth the physical impact of data flows is reshaping our cities and energy infrastructures This book uncovers the hidden world of data centres from vast complexes in Virginia to digital suburbs in Paris and innovative facilities in Sweden Through twenty insightful case studies from Europe and the US it reveals how these often overlooked infrastructures influence urban change and energy consumption Written for readers interested in urban planning sustainability and technology this book sparks a vital dialogue on sustainable futures and provides crucial insights to help shape policies concerning digital and energy landscapes

Les philosophies des techniques Xavier Guchet, 2023-06-01 En un siècle les techniques ont acquis une puissance inédite Une nouvelle forme du monde en résulte Ces mutations mettent à l'épreuve nos capacités et provoquent de nouvelles crises aux enjeux multiples En convoquant l'histoire longue *Les philosophies des techniques* interroge les continuités et les ruptures induites par la puissance des techniques contemporaines sans les résumer au numérique Il fait résonner treize auteurs de traditions différentes et propose des outils pour combiner techniques productives et durabilité innovation et responsabilité Cet ouvrage prend le pari que face au déploiement tentaculaire et métamorphique des techniques la philosophie est même de répondre des mutations qui sont autant de chances pour façonner notre avenir Les techniques ont aujourd'hui besoin d'un moment philosophique

Pour une écologie politique Michel Aglietta, Étienne Espagne, 2024-02-14 L'expansion du capitalisme est fondée sur l'exploitation de la nature comme un don gratuit Le projet du Capitaloc ne est de clarifier les soubassements physiques et naturels du

capitalisme de montrer ses limites institutionnelles et spatiales Ce livre commence par montrer comment les processus d'accumulation du capital ont bouleversé au cours de l'histoire les équilibres écologiques et les moyens de subsistance des sociétés. Analysant les régimes historiques de viabilité qui se sont succédé, il met au jour le rôle central de la monnaie et de la finance dans l'émergence de la perpétuation dans l'espace puis la crise des hiérarchies écologiques. Le livre examine ensuite ce que pourrait être une écologie politique au-delà du Capitalocène. Quels en seraient les principes de régulation ? Comment valoriser le climat et la biodiversité ? Comment restaurer les biens communs face à la logique d'appropriation gratuite de la nature ? La question de la valeur est ici décisive. Appelant une transformation de la gouvernance des entreprises, un retour assumé aux politiques industrielles pour les secteurs du carbone, et la réforme d'une architecture financière internationale, Michel Aglietta et tienne Espagne plaident pour une planification stratégique seule capable de fonder une écologie politique compatible avec les limites planétaires. Un livre fondamental pour comprendre l'articulation du capitalisme et de l'écologie. Michel Aglietta est professeur maître de conférences à l'université Paris Nanterre et conseiller scientifique au CEPII. Il a été membre de l'Institut universitaire de France et membre du Haut Conseil des finances publiques. tienne Espagne est économiste du climat à la Banque mondiale et chercheur associé au Centre d'études et de recherches sur le développement international CERDI. Il enseigne régulièrement à l'université Paris 1 et à l'École polytechnique. Il a précédemment travaillé à l'Agence française de développement au CEPII, France Stratégie et au CIRED.

Mythologie de l'événement Christian Sommer, 2017 Cette thèse formule l'hypothèse critique d'une opération de remythologisation par une réactualisation théologico-politique de la tragédie chez Heidegger. Cette opération ne saurait simplement coïncider avec une revalorisation irrationnelle du mythe car elle procède d'abord d'une mise en question non moins problématique de la dualité supposée entre muthos et logos pour culminer dans ce qu'une note des années 1950 appellera la mythologie de l'événement. La rélaboration de la notion de mythe s'accomplit à partir du point de vue de Heidegger qui doit préfigurer les dieux de l'autre commencement post-judaïque chrétien selon le projet spéculatif d'une religion censée relier le peuple, ses dieux nouveaux, via l'être comme événement. L'hypothèse d'une remythologisation théologico-politique doit ainsi permettre d'éclairer non seulement le rôle matriciel de Heidegger pour la pensée de l'être mais aussi le surinvestissement illusoire du national-socialisme censé donner lieu au peuple de Heidegger. Pour interroger cette réactualisation théologico-politique du mythe, l'étude se concentre sur les cours que Heidegger consacra à Heidegger tout en sollicitant l'intégralité du corpus des années 1933-1945, c'est-à-dire les cours fribourgeois, les traités inédits rédigés dans le sillage des *Beiträge* et les *Schwarze Hefte*. Critique de la destruction créatrice Pierre Caye, 2015 La 4^e de couverture porte Le système productif contemporain repose sur le paradoxe de la destruction créatrice faisant de la richesse une affaire non pas d'accumulation et de patrimonialisation de construction et d'édification mais de destruction d'obsolescence programmée de place nette et de

table rase Cette illusion quasi métaphysique produite par les grandes guerres du XXe siècle est aujourd'hui de moins en moins soutenable de plus en plus coïncidant d'un point de vue aussi bien symbolique que matériel La critique du système productif change dès lors de nature Il s'agit moins de penser l'intensification de la production sa libération sa généralisation l'ensemble des activités sociales que sa durabilité voire sa généralité savoir sa capacité transmettre ses fruits la postérité Ce qu'on appelle le développement durable C'est la recherche de ses principes aussi bien philosophiques que techniques et juridiques que s'attache la Critique de la destruction créatrice

Humanités numériques Franc Morandi, Claude Baltz, Éric Delamotte, 2021-03-01 Les humanités numériques relèvent du tissage des idées de technique d'information de social et d'engagement humain dans la reorganisation généralisée d'une culture Elles représentent un mouvement pluridisciplinaire culturel et informationnel majeur Associées aux dispositifs numériques qui redéfinissent notre environnement et nos modes de connaissance les humanités numériques constituent un ensemble de pratiques englobant celles des humanités et d'interrogations explorer Cet ouvrage offre un parcours pluridisciplinaire et critique sur le sens du nouvel ordre informationnel et sur la transformation que le numérique opère sur nos humanités Il interroge au-delà des conformismes les reconfigurations pluridisciplinaires liées la recherche les significations expérientielles au sein d'une écologie de l'information ainsi que l'attention portée à l'humain et son intelligence Loin d'une zone de confort ou d'une solution technologique il traite bien au cœur de l'existence informationnelle des enjeux d'une humanité
