Daniel Cho, 2024-10-17 Develops a new psychoanalytic theory of genius a concept that is often invoked and pervasive in popular culture but which is rarely scrutinized in depth In the absence of this scrutiny genius has come to be understood as exceptional talent or intelligence an elitist notion Genius After Psychoanalysis intervenes in this debate by offering a new account of genius Drawing on the work of Sigmund Freud and Jacques Lacan K Daniel Cho argues that genius is not exceptional talent or intelligence but is related to and illuminated by the psychological concept of sublimation where the unpleasures that arise when our intellectual products fail become themselves pleasurable Beginning with a close examination of Freud's work on Leonardo da Vinci Cho analyzes film art our relationship to nature politics group psychology love and philosophy to demonstrate that genius far from an elitist notion is universally available through a different approach to ideas of imperfection disappointment and failure Genius After Psychoanalysis is a bold new intervention on a culturally central but understudied topic *Oceans and Human Health* Patrick J. Walsh, Sharon Smith, Lora Fleming, Helena Solo-Gabriele, William H. Gerwick, 2011-09-02 Oceans and Human Health highlights an unprecedented collaboration of environmental scientists ecologists and physicians working together on this important new discipline to the benefit of human health and ocean environmental integrity alike Oceanography toxicology natural products chemistry environmental microbiology comparative animal physiology epidemiology and public health are all long established areas of research in their own right and all contribute data and expertise to an integrated understanding of the ways in which ocean biology and chemistry affect human health for better or worse This book introduces this topic to researchers and advanced students interested in this emerging field enabling them to see how their research fits into the broader interactions between the aquatic environment and human health Color illustrations of aquatic life and oceanic phenomena such as hurricanes and algal blooms Numerous case studies Socio economic and Ethical Analyses place the science in a broader context Study

The Trouble With Humans Christopher Anvil, 2007-08-01 Humans there's no understanding them And no dealing with them either Or even their planet Pity the poor aliens whose shape changing ability should let them take over the planet Earth before the humans even know they're there if it weren't for all that omnipresent pollution Or consider another set of invaders from a planet where the weather is always mild and the changing of the seasons is hardly noticeable They land in force and their weapons are more powerful than those of the primitive humans but they've never before had to deal with below zero temperatures flash floods or tornados not to mention volcanoes Then there were the aliens who noticed how belligerent

humans were and gave them the gift of TV like devices which would show anything anywhere on Earth which was sure to lead to war Imagine how surprised the aliens were when the humans took the gadgets apart improved them and started spying on everything the aliens were up to all over the galaxy Humans don t make sense they don t fight fair and they re making aliens throughout interstellar space think seriously about pulling up stakes and moving to another galaxy At the publisher s request this title is sold without DRM Digital Rights Management
