Dayton® Electric Chain Hoists

Description

Dayton electric chain hoists are rugged, portable hoists that provide quick, precise lifting. The hoists are constructed of tough, but lightweight, die cast aluminum alloy housings. An oil bath transmission, equipped with heat-treated, alloy steel gears and an overload limiting clutch, provides smooth and reliable operation. With a pushbutton station that fits comfortably in one hand, the operator can safely control the hoist while the other hand is free to guide the load. The electrical controls, which are readily accessed under the electrical cover, utilize quick-connect terminals for easy voltage conversions and a 24V control circuit for added safety.

Other features that ensure the safe operation of Dayton electric chain hoists include a magnetic disc brake that delivers sure stopping and secure holding of the load. Adjustable upper and lower limit switches regulate the load travel. For additional safety, a chain stop is attached to the slack end of the hoist chain.

Dayton electric chain hoists are designed and tested in accordance with the American Society of Mechanical Engineers Code B30.16, "Safety Standard for Overhead Hoists." Hoists are built in compliance with CSA, file number LR 44664. Made in U.S.A.
