Dayton® Portable Submersible Utility Pumps

Description

This submersible utility pump operates manually and is intended for numerous applications, including draining of flooded basements, dewatering construction sites, and excavations. The unit operates efficiently on a 115V, 60 Hz., single phase, permanent split capacitor motor that includes a 10 feet long, 18 gauge, 3-prong power cord. The motor is maintenance-free. Neither the motor nor ball bearings require further lubrication. Additionally, the motor is protected from overheating and damage. It automatically shuts off with sudden rises in temperature and restarts after cooling down.

The pump is made from high-quality, durable materials, including: aluminum alloy for the motor casing and thermal plastic for the pump housing; stainless steel hardware and shaft; ceramic for shaft sleeve; Buna-N for lip seal; and a non-clog plastic composite impeller.

General Safety Information

READ AND FOLLOW SAFETY INSTRUCTIONS

Before turning on the pump, be sure to secure the discharge line. If it is not secured, the discharge line could flail erratically, potentially causing injury to you or others and/or property damage.

Before attempting service, unplug the power and release all pressure by draining all water within the system.

Inspect and do routine maintenance on the pump and system on a regular basis. Keep debris and foreign objects away from the unit.

⚠ WARNING To reduce the risk of electric shock, unplug the unit before servicing. This pump has not been approved for use in swimming pool areas. The pump is equipped with a grounding conductor and grounding-type attachment plug. Make sure it is connected only to a properly grounded grounding-type receptacle. If a 2-prong wall receptacle is present, it must be replaced with a properly grounded 3-prong receptacle installed in accordance with all codes and ordinances that apply.

NOTE: This equipment is for use on 115 volt (single phase) only and is supplied with an approved 3-prong plug and grounding cord.

- Follow all required electrical and safety codes when wiring an electrically driven pump.
- Ensure the power source is compatible with the requirements of your equipment.
