It offers numerous examples highlighting what to follow and what to avoid. This revised edition covers the effective use of PowerPoint™ and other computer-based presentation programs. Razzle Dazzle James H. Bruns, 2022-11-10 During World War I, American merchant ships were given oddly colored paint jobs to distort their profiles at sea. Dubbed Razzle Dazzle, these camouflage patterns were believed responsible for dramatic decreases in Allied shipping losses. This book examines the real and more compelling factors that made a difference in the survivability of merchant shipping, the various measures taken principally by the U.S. Navy, including the use of convoys and destroyer escorts, along with some innovative naval technologies. At the same time, advances in America's shipbuilding industry and the development of the nation's first major on-the-job training program enabled mass production of merchant ships at a record pace.

Scale Cristian Suteanu, 2023-01-01 This book provides up-to-date, in-depth, and accessible information on the concept of scale and focuses on its applications in geography, Earth science, environmental science, and other fields in which the environment plays a significant role. Although the book presents methods and applications as a response to practical challenges, it is primarily concept-centered; it identifies a set of distinct yet related notions of scale, analyzing and elucidating their evolving meanings in a systematic way. Concepts are defined with a focus on their practical, operational applicability, and the introduction of methods is supported by concrete examples. The book links theoretical insights to illustrating applications involving a broad range of themes, from maps, fractals, and chaos theory to fine art and literature. It approaches the subject in a spatial, temporal, and spatio-temporal context, including a wide diversity of spatial features from Earth and other planets, as well as time series and space-time patterns. This monograph is expected to be useful, especially because in practice the various scale-focused concepts are not neatly separated and immiscible. It is therefore helpful for scholars in physical and human geography, Earth and environmental sciences, and other fields to benefit from a clear conceptual framework that distinguishes and illuminates the various scale-related concepts and their interconnections. Selected chapters can also support a deeper understanding of the concept of scale for graduate and undergraduate students in geography, the natural sciences, and the humanities. Information on recommended additional literature and comments about specific sources offer a guide to further reading on the topics addressed in the book.

Twelve Views of Manet's Bar Bradford Collins, 2021-01-12 Bradford Collins has assembled here a collection of twelve essays that demonstrates through the interpretation of a single work of art the abundance and complexity of methodological approaches now available to art historians. Focusing on Manet's *A Bar at the Folies Bergère*,

each contributor applies to it a different methodology ranging from the more traditional to the newer including feminism Marxism Lacanian psychoanalysis and semiotics By demonstrating the ways that individual practitioners actually apply the various methodological insights that inform their research *Twelve Views of Manet's Bar* serves as an excellent introduction to critical methodology as well as a provocative overview for those already familiar with the current discourse of art history In the process of gaining new insight into Manet's work and into the discourse of methodology one discovers that it is not only the individual painting but art history itself that is under investigation An introduction by Richard Shiff sets the background with a brief history of Manet scholarship and suggestions as to why today's accounts have taken certain distinct directions The contributors selected to provide a broad and balanced range of methodological approaches include Carol Armstrong Albert Boime David Carrier Kermit Champa Bradford R Collins Michael Paul Driskel Jack Flam Tag Gronberg James D Herbert John House Steven Z Levine and Griselda Pollock
