Designing Texts Teaching Visual Communication Baywoods Technical Communications:

Designing Texts Eva Brumberger, Kathryn Northcut, 2016-12-14 Designing Texts is an edited collection dedicated to teaching visual communication in non visual disciplines with a particular focus on the fields of technical and professional communication rhetoric and composition

A Unified Theory of Information Design Nicole Amare, Alan Manning, 2016-11-03 Communicative visuals including written text have a diverse range of forms and purposes In this volume the authors show that it is possible to both describe and explain the major properties of diverse visual communication forms and purposes within a common theoretical framework of information design and ethics For those unaccustomed to thinking of written text as a visual form belonging to the same general class as other visual forms colour texture shape imagery etc consider how a text s readability suffers if we remove all white space and punctuation which can be identified as visual signals of the same subtype as grid lines and bullet points dividing and calling attention to adjacent information The authors identify deep connections between foundational visual design elements and the grammar of language itself No physicist or chemist today questions the value of a single theory that describes and explains a wide variety of phenomena but oddly enough the authors have frequently been asked why they are interested in advancing a unified theory of visual communication The simplest answer is to treat visual communication as a science and seeking unified theories is just what science does In more practical terms a unified approach to visual communication allows us to teach visual design students relatively few things that will enable them to do relatively many things

Advancements in the Philosophy of Design Pieter E. Vermaas, Stéphane Vial, 2018-03-02 This volume presents 25 essays on the philosophy of design With contributions originating from philosophy and design research and from product design to architecture it gives a rich spectrum of state of the art research and brings together studies on philosophical topics in which design plays a key role and design research to which philosophy contributes Coverage zooms in on specific and more well known design disciplines but also includes less studied disciplines such as graphic design interior architecture and exhibition design In addition contributors take up traditional philosophical issues such as epistemology politics phenomenology and philosophy of science Some essays cover philosophical issues that emerge in design for instance what design can do in addressing societal problems while other essays analyze main stream philosophical issues in which design is part of the argument as for instance abduction and aesthetics Readers will discover new research with insightful analyses of design research design thinking and the specificity of design Overall this comprehensive overview of an emerging topic in philosophy will be of great interest to researchers and students
