

The background of the entire page is a dramatic, dark painting. It depicts a volcanic eruption with a massive, glowing red and orange lava flow dominating the upper half. In the foreground, a dark, silhouetted city is visible, with smoke or ash rising from it. The overall mood is apocalyptic and catastrophic.

Destruction Sodom Scientific Graham Harris:

The Destruction of Sodom Graham J Harris, 2015-11-26 In *The Destruction of Sodom* the Biblical account of the destruction of Sodom and Gomorrah is examined under the spotlight of modern science against a cultural backdrop of history and archaeology In this scientific reconstruction the account of events described in the book of Genesis is verified and it is established that the destruction occurred at about 2350 BC as a result of an earthquake induced landslide transporting Sodom to the depths of the Dead Sea Strands of geography geology and engineering science are drawn together to provide comprehensive treatment of all relevant scientific aspects pertinent to a rational understanding of the mechanics of the disaster The detailed scientific argument follows a discussion of the Genesis account and considerations of Canaanite culture and commerce with specific attention to the trade in bitumen On this point Graham Harris provides evidence that the mainstay of Canaanite commerce was the exploitation of the bitumen resources of the Dead Sea that the Sodomites were among the world's first chemical engineers and from the resources of the region a large number of processed materials also would have been exported to Egypt The Destruction of Sodom is an example of the application of science to a fuller understanding of one of the most intriguing events of the Old Testament and will be of direct interest to scholars as well as to the wider public
