The Upper Valley Academy is a private school for students in grades 7-12. The school is located in a rural area of New York and is known for its commitment to environmental education.

The school's commitment to environmental education is reflected in its architecture. The building is designed to be a model of sustainable design, with a focus on energy efficiency and environmental friendliness.

The building's design is a result of a collaborative process between the architect and the school's staff. The goal was to create a building that would be both functional and inspiring, and that would reflect the school's values.

Detail In Contemporary Timber Architecture:

Detail in Contemporary Timber Architecture Virginia McLeod, 2015-09-08 Architectural detailing is what makes a design unique and an architect outstanding. *Detail in Contemporary Timber Architecture* provides analysis of both the technical and the aesthetic importance of details in modern timber architecture. Featuring the work of renowned architects from around the world, this book presents 50 of the most recently completed and influential timber designs for both residential and commercial architecture. Each project is presented with color photographs, site plans and sections and elevations as well as numerous construction details. There is also a descriptive text, detailed captions and in depth information for each project including the location, client, architectural project team, main consultants and contractors. The projects are presented in clear and concise layouts over four pages. All of the drawings are styled consistently and presented at standard architectural scales to allow for easy comparison. There is also a CD ROM which contains all the drawings as printed in the book in both EPS and DWG generic CAD formats. In addition, the book features an index of architects that includes the name, address and all contact details for each architect included. *Detail in Contemporary Timber Architecture* is an excellent reference work for practising architects as well as architecture and design students.

Detail in Contemporary Residential Architecture Virginia McLeod, 2012-09-19 *Detail in Contemporary Residential Architecture* provides analysis of both the technical and the aesthetic importance of details in the development of contemporary residential architecture. Featuring many of the world's most highly acclaimed architects, the book presents more than 50 of the most recently completed and influential house designs. For each house, there are color photographs, plans of every floor, sections and elevations as well as numerous consistently styled construction details. The book also features in depth information for each project.

Encyclopedia of Detail in Contemporary Residential Architect Virginia McLeod, 2010-09-01 This is a comprehensive sourcebook containing newly commissioned scale drawings of every type of architectural detail taken from 100 of the best contemporary houses. Over 700 detailed drawings of walls, floors, ceilings, doors, windows and staircases feature keys explaining construction techniques and materials used. Each drawing is cross referenced to other details from the same building. This is an invaluable reference for all architects showing the best examples of residential detailing from around the world. A bonus DVD includes all of the drawings featured in the book.

Detail in Contemporary Glass Architecture Virginia McLeod, 2011-09-21 Following the success of the earlier titles in this series, *Detail in Contemporary Glass Architecture* provides analysis of both the technical and the aesthetic importance of details in modern glass architecture. Featuring the work of renowned architects from around the world, this book presents 50 of the most recently completed and influential glass designs for residential, public and commercial architecture. Each project is presented with colour photographs, site plans and sections and elevations as well as numerous construction details. There is also a descriptive text, detailed captions and in depth information for each project including the location, client, architectural project team, main consultants and contractors. Saunders 1969 is one of the most important young contemporary Canadian architects working internationally His architecture simple yet powerful incorporates elements of his country s architectural identity including the use of wood and carefully picked Modernist influences bringing it at the same time into the 21st century with excellent execution carefully chosen materials and a hands on approach Saunders he lives and works in Bergen Norway has successfully executed work in both Canada Norway and Finland creating architecture with a strong sense of northern identity an individual approach that is informed by the strongness of natural landscape The most important projects Aurland Lookout Long Studio Fogo Island Tower Studio Fogo Island Squish Studio Fogo Island and Villa G The first reference monograph on a remarkable young architect working in Scandinavia and Canada The monograph provides interesting unpublished documents curated by Jonathan Bell Architecture Editor Wallpaper magazine and Ellie Stathaki Deputy Architecture Editor Wallpaper magazine as well as three interviews by Olaf Gipser Zita Cobb and Brian MacKay Lyons The artwork of the book is by the international renowned graphic designer Henrik Nygren Contemporary Slovenian Timber Architecture for Sustainability Manja Kitek

Kuzman,Andreja Kutnar,2014-09-15 The book presents Slovenia s contemporary timber architecture Thanks to its abundant forests Slovenia has preserved the tradition of wood construction As much as 60% of its surface is covered by forests Slovenia is also the third most forested country in Europe The high share of forest covered surface allows for a sustainable production of high quality wood In the past wood was used primarily in the construction of farm buildings but now timber architecture is used for everything from residences and office buildings to public buildings such as community centres and schools Timber construction is becoming increasingly popular Apart from larger companies taking this approach a great number of wooden houses have sprung up built either on personal initiative or with the support of carpenter workshops Slovenian timber architecture has taken a new approach to environmental and energy efficiency problems and received great

international recognition The book discusses over fifty projects built over a ten year period and includes descriptions photographs and plans The projects include residential areas administration and office as well as tourist educational and industrial buildings Timber architecture is presented as an integral part of the Slovenian landscape The monograph will be useful to designers and future experts in their planning of optimal timber buildings and will highlight the main benefits of using timber construction

Energy-Efficient Timber-Glass Houses Vesna Žegarac Leskovar, Miroslav Premrov, 2013-09-30 The book discusses combining timber and glass two eco materials with a view to developing an optimal contemporary energy efficient house with an attractive design Furthermore the book connects an architectural design approach with structural research to show the possibilities of stabilizing the building with an increased size of the glazing Research results where the glazing is considered as a load bearing structural element are therefore presented in a manner leading to the development of an optimal model of the timber glass house considering both the structural and energy related aspects The presented research work can be useful to designers and future experts in their planning of optimal energy efficient timber buildings The study is based on using timber and glass which were previously neglected as construction materials With suitable technological development and appropriate use they are nowadays becoming essential construction materials as far as energy efficiency is concerned However their combined use is extremely complicated from both the constructional point of view as well as from that of energy efficiency and sets multiple traps for designers A good knowledge of their advantages and drawbacks is thus vitally important which is shown in the present monograph Energy efficient timber glass houses was selected by the Slovenian National Research Agency as an extraordinary scientific achievement in the field of technical sciences civil engineering for the year 2013

Design and Construction of Bioclimatic Wooden Greenhouses, Volume 3 Gian Luca Brunetti, 2022-12-19 This book is the third of four dealing with bioclimatic design and construction by focusing on the most basic and polyvalent of modern environmental systems the bioclimatic greenhouse the Swiss army chainsaw of architecture More specifically this third volume focuses on how the envelope of bioclimatic wooden greenhouses may be designed and built In more general terms it helps us to consider how to design and build the transparent and opaque enclosures of bioclimatic low energy architecture with low environmental impact This multi volume book covers both free standing greenhouses that can naturally heat and cool themselves and lean to greenhouses that support the natural heating and cooling of buildings this includes both agricultural greenhouses and greenhouses suited to host people As a result it is a trans disciplinary work deriving its areas of concern from a broad range of study areas spanning from environmental to constructional to structural drawing the clarity of the approach from the fact that the topics are presented by a single author with a single voice and a designer s mindset To achieve this the book adopts a composite set of explanatory strategies and communication registers including extensive support by 3D construction drawings and examples and presents not only state of the art solutions but also experimental ones
