

Introduction to the Butler Biology Handbook

Hello!

We are delighted to share our work with you and hope the Biology Student Handbook will become a useful classroom tool or resource for you!

We, the authors, developed the first version of this handbook in 2000 as a solution to the problem of decreased instructional time when the school district began block scheduling. Our goal was to find a way to share information with students in a condensed and organized fashion, preserving valuable time for essential labs, activities, and independent work. The result of many hours of research, writing, classroom use, stress, coffee, late-night revelations, and yearly revisions is what you have before you. We designed the handbook using our years of experience in the classroom, the most current state standards, and recent educational research. Below is a chart outlining some of the classroom issues the use of the handbook as a classroom tool addresses, a brief explanation of how the handbook addresses these issues, and credit to the supporting research:

Obstacles	Handbook	Research
