De De Constructie Van De Levensloop:

De levensloop van een bedrijfsmiddel Stefan Ruyschaert, Wim Van Kerchove, 2011 *Unravelling Trauma and Weaving Resilience with Systemic and Narrative Therapy* Sabine Vermeire, 2022-12-01 Unravelling Trauma and Weaving Resilience with Systemic and Narrative Therapy is an innovative book that details how clinicians can engage children families and their networks in creative and collaborative relationships to elicit change within the context of trauma and violence Combining systemic narrative and dialogical theoretical frameworks with clinical examples this volume focuses on therapeutic conversations that can help children and those involved with them deconstruct their experienced difficulties and create more hopeful stories and alternative ways of relating to one another through a sense of play Vermeire advocates for serious playfulness as a way of directly addressing trauma and its effects as well as along trauma sensitive side paths Puppetry artwork interviews and theatre play are used to weave networks of resilience in ever widening circles and this approach is informed by the awareness that individual problems are always to be seen as relational social and political This book is an important read for therapists and social workers who work with traumatised children and their multi stressed families

Teachers Responding to Religious Diversity in Europe. Researching Biography and Pedagogy Anna van der Want, Cok Bakker, Ina ter Avest, Judith Everington, 2009 Currently all European societies are experiencing a transformation process towards greater cultural and religious pluralisation Teachers need new answers to turn religious diversity into a resource for peaceful coexistence not a cause of misunderstanding division and hostility Through a qualitative approach we follow the different strategies of teachers to cope with religious diversity in the classrooms of six European countries from Estonia to France from Norway to England from Germany to the Netherlands The juxtaposition of biographical information on the teachers together with their views on religious diversity and their strategies in responding to it provides a well rounded and extremely attractive impression of the attitudes of teachers in Europe The role of the teacher takes on great significance He or she has to meet the twin demands of offering both a solid basis of factual information and the opportunity to formulate individual interpretations and opinions The readers of this book are offered the opportunity to gain insight into the field of the study at two levels They can access the findings of the analyses of the respective national contexts and the European comparison At the same time they are able to study portraits of all of the teachers interviewed in the course of the project so that the collation of data is complemented by insight into the human perspective and the influence of national contexts This is valuable for readers as it offers material for discussions and seminars in the field of education on two very different levels the portraits as working material **The Social Embeddedness of Media Use** Henk Westerik, 2009 From an integrative theoretical perspective this book looks at how families watch television news in their everyday lives In three empirical studies the role of short term situations and the influence of immediate social surroundings on practices of watching the news is analyzed Researching the Self Willem E. Frankenhuys, Ellen Grunewald, 2021-02-19 Researching the Self originated in a

conference held at the University of Amsterdam in 2005 where scholars from various academic backgrounds presented their current theories and research One central theme that emerged from the conference is the need for interdisciplinarity in the study of self The present volume tries to meet this need as it covers fields as diverse as psychology anthropology neuroscience philosophy sociology and computer science Additionally the authors have contributed interdisciplinary reflections in which they contemplate the other contributions to the present volume and consider integrating this work with their own What are the neural correlates of self Can individuals have multiple selves How do selves depend on other people Will engineers ever construct artificial selves What is the problem of self we are trying to solve What does the future hold for the self Do selves really exist As I read the other entries in the current volume I was struck by the implications that the many different perspectives on the self had for each other Gillihan this volume We must continue to keep in mind what we know what we don't know and what we only think we know in order to successfully conquer this interdisciplinary problem of the self Gorman and Keenan this volume

Groen En Grijs K. van Kordelaar, A. Vlak, Y. Kuin, G. Westerhof, 2008-12-08 Groen en grijs is een heldere handleiding om jongeren en ouderen met elkaar in gesprek te brengen Als zij elkaars belevingswereld beter leren kennen zal er een minder stereotiep beeld ontstaan waardoor het verlenen van zorg aan ouderen en het stimuleren van het welzijn van ouderen gebaseerd kunnen worden op de individuele wensen en behoeften Zo n 15% van de Nederlandse bevolking bestaat uit mensen van 65 jaar of ouder Dat percentage zal de komende jaren oplopen tot 20% Toch is er maar weinig contact tussen jongeren en ouderen zeker buiten het familieverband Mede hierdoor ontstaan er stereotiepe beelden Jongeren die een opleiding volgen op het gebied van zorg en welzijn zullen in toenemende mate met ouderen te maken krijgen Van professionals mag je verwachten dat zij zich in contact met ouderen niet laten leiden door stereotypen Daarom is dit boek geschreven

The Unexpected Third Hanneke

Meulink-Korf,Aat van Rhijn,2016-08-01 We believe that a person always stands before God hand in hand with others and at the same time with others before God With these words the authors theologians and therapists alert us to the importance of understanding a person within her or his relational network context This context refers not only to the current relational network but also to the generations before us and the generations to come In this way the conflicts of the past generations but also their resources influence the people of the current generation and this in turn has an influence on the unborn generations Family loyalty predetermines the choices we make and the priorities we set How can family loyalty be a liberating motivation as a legacy for living with each other but also for meeting with others outside the family and even outside their own heritage and influences regarding e g ethnicity culture politics and religion church The aim of the contextual pastoral care approach is to develop a greater understanding between people and culture within their specific contexts and participate in restoring trust and trustworthiness within their relations In this way God is in our midst on our journey towards fairness trust and hope This intergenerational dialogical approach was inspired by the work of the Hungarian American family therapist and psychiatrist Ivan Boszormenyi Nagy and was later in turn inspired by scholars such as Martin Buber and Emmanuel Levinas The Unexpected Third is used in many pastoral courses academic post academic and practical in the Netherlands and in Eastern Europe It is received as a meaningful contribution to Practical Theology and Pastoral care for individual counselling family care and also for reworking certain conflicts in the parish and community
