De Aartsvaders Grondleggers Van Het Nederlandse Bedrijfsleven:

De aartsvaders Wim Wennekes, 1994 Biografie n van een vijftiental grondleggers van het Nederlandse ondernemerschap zoals Fokker Plesman Philips Van den Bergh en Jurgens en Mees **The Lonely Quest of Unilever's CEO Paul Polman** Jeroen Smit, 2023-07-25 When Paul Polman became the CEO of the multinational Unilever in 2009 he set out on a quest to convince his colleagues his board and the outside world that companies do not have the right to exist if their only purpose is making money More importantly he set out to prove that a company could in fact be both profitable and sustainable The Great Battle or The Lonely Quest of Unilever s CEO Paul Polman investigates how Polman navigated between making money and doing the right thing Smit convincingly argues that Polman was too far ahead of his time but that his ideas about responsible capitalism are the very thing we need to turn the tide **Dutch Enterprise in the 20th Century** Keetie E. Sluyterman, 2013-07-04 This is the first book to summarise the twentieth century economic history of the Netherlands from a business history perspective It has a broad historical coverage of Dutch business development including in particular the major multinationals such as Philips Shell and Unilever Although focused on Dutch business it has a strong international flavour **Organized Crime in the Netherlands** Cyrille J.C.F. Fijnaut, Frank Bovenkerk, Gerben Bruinsma, Henk van de Bunt, 2023-09-20 Nowadays organized crime is a very important political issue in Europe However scientific studies on the nature and seriousness of this problem are very scarce in the member states of the Council of Europe and the European Union This national study on organized crime in the Netherlands was prepared for the Commission of Inquiry of the Dutch Parliament that recently made an investigation into the regulation and use of undercover policing It not only contains an analysis of the contemporary manifestations of traditional organized crime but also answers the question whether organized crime already has penetrated legitimate sectors of the economy or not In addition special attention is paid to the role of the liberal professions and the banking system and to the use of counter strategies by criminal groups corruption intimidation violence disinformation etc **Transnational Organized Crime** Margaret E. Beare, 2017-07-05 This selection of influential articles traces our evolving understanding of transnational organized crime paradigm shifts from the alien conspiracy focused research to the more nuanced focused scholarship on markets and networks culminating in a focus on enablers of transnational crimes and evaluations of harm from transnational crimes The selected essays and articles reflect the way in which politics economics and social factors have impacted on scholarly thinking and the introduction also highlights the many authors and professionals who have been influential in this field This volume is an essential one stop resource for lecturers and students interested in all aspects of transnational organized crime **The Strictures of Inheritance** Jan Luiten van Zanden, Arthur van Riel, 2021-04-13 A major feat of research and synthesis this book presents the first comprehensive history of the Dutch economy in the nineteenth century an important but poorly understood piece of European economic history Based on a detailed reconstruction of extensive economic data the authors account for demise of

the Dutch economy's golden age. After showing how institutional factors combined to make the Dutch economy a victim of its own success, the book traces its subsequent emergence as a modern industrial economy. Between 1780 and 1914 the Netherlands went through a double transition. Its economy, which in the words of Adam Smith was approaching a stationary state in the eighteenth century, entered a process of modern economic growth during the middle decades of the nineteenth. At the same time, the country's sociopolitical structure was undergoing radical transformation as the decentralized polity of the republic gave way to a unitary state. As the authors show, the dramatic transformation of the Dutch political structure was intertwined with equally radical changes in the institutional structure of the economy. The outcome of this dual transition was a rapidly industrializing economy on one side and on the other the neocorporatist sociopolitical structure that would characterize the Netherlands in the twentieth century. Analyzing both processes with a focus on institutional change, this book argues that the economic and political development of the Netherlands can be understood only in tandem.

Multinational Enterprises from the Netherlands Rajneesh Narula, Roger van Hoesel, 2002-09-11. Despite the long history of international economic activity and the dominant role of Dutch MNEs in the world economy, there has been relatively little academic research in the area. This book explores issues such as: What historical precedents underlie the character of Dutch MNE activity? How and why the technological specialisation of the Dutch economy and its firms has evolved to its current state? The changing FDI activity of Dutch MNEs. The strategic aspects of Dutch MNE activity in terms of location and R D. The implications for Dutch MNEs of globalisation and economic integration. Comprehensive in its coverage, this book will be of great interest to students and researchers in international business.

The Rise of the English Regions? Irene Hardill, Paul Benneworth, Mark Baker, Leslie Budd, 2006-10-03. A critical look at regional development and governance, examining the causes of the South East domination and comparing each region in terms of its characteristics and its experience of devolution.

The European Difference László Zsolnai, 2012-12-06. The European Difference: Business Ethics in the Community of European Management Schools aims to present the business ethics provisions, programs and experiences of member universities of the Community of European Management Schools (CEMS). This book also attempts to demonstrate the distinctiveness and cultural integrity of European business ethics. Not surprisingly, the character and the level of development of business ethics in the represented European countries are diverse. However, common characteristics can be discovered in the business ethics experiences described in this volume. One principal theme that emerges is that European business ethics is deeply rooted in culture and less influenced by abstract principles and ideas. Some critical distance from the mainstream American approach to business ethics is also a common characteristic of contributions in this book. This book was born from the fruitful exchange of the CEMS Inter-faculty Group in Business Ethics. CEMS was founded in 1988 as an association of top-level schools of management education throughout Europe, and inter-faculty groups were established to develop joint teaching materials and to encourage collaboration among the researchers at the various CEMS

schools Theorizing Entrepreneurship for the Future Joost Beuving, 2023-06-09 Presenting a new interpretation of entrepreneurial behaviour this book focuses on how entrepreneurs consider the future looking at their social practices language and rituals through which they neutralize or smoothen future unknowns The study theorizes entrepreneurial behaviour as future work the social practices language and rituals through which entrepreneurs neutralize or smoothen future unknowns The study is grounded in ethnographic case material from global frontiers second hand car dealers in West Africa exporters of fresh fish from Lake Victoria East Africa farmed fish entrepreneurs in Greece and investment bankers in Financial America It targets students and scholars from the social sciences and economics and it has theoretical and practical implications
