Designing With Climbers The Joy Of Gardening:

The Planting Design Handbook Nick Robinson, 2016-06-17 Since the first edition was published in 1992 Nick Robinson's *The Planting Design Handbook* has been widely used as a definitive text on landscape architecture courses throughout the world. It remains one of the few titles written by a practicing landscape architect and educator who is also a horticulturalist and accomplished plantsman and which deals with the application of planting design on a large scale in landscape architecture and urban design projects. *The Planting Design Handbook* is distinctive for its elegant integration of an ecological approach with an understanding of visual and spatial composition. It emphasizes the role of vegetation layers and designed plant communities in complex and diverse plant assemblages for all kinds of sites and uses. This expanded and comprehensively updated third edition still provides a complete examination of principles and practice of design for public institutional and private landscapes. It takes account of developments in theory and practice especially in the use of perennials and reflects a variety of media and approaches current in landscape architecture and design. All chapters have been revised and re-written to ensure updated references and new references have been added. Many new photographs of planting and projects around the world have been included with examples of current professional drawings to illustrate the design process. It is generously illustrated including a colour section and the beautifully detailed line drawings of the Chinese architect and painter Jia Hua Wu.

Australian Planting Design Paul Thompson, 2012-04-12

Australian Planting Design identifies and explores all aspects of developing better planting designs on any scale, raising awareness of the essential elements and encouraging readers to look with fresh eyes to create anew. This new edition guides the reader through all the stages of designing a new garden and helps to visualise the garden through an understanding of space, light, earth, form, structures, and vegetation. It discusses the choosing of plants, their form and shape, balancing plant types, fire, and vegetation design and form. The final section of the book looks at the dynamic garden and the importance of designing for change. *Australian Planting Design* focuses on how Australian plants may be used in gardens, whatever their size, function, or site. It shows the way to use our plants to form a variety of satisfying, interesting, and purposeful areas for both people and nature. As the availability of a much wider range of Australian plants grows, so too does our understanding of their qualities and habits. Our changing ecological attitudes and broader understanding of local habitats have brought the Australian landscape into sharper focus, and we have gained a new appreciation of its value for design expression. We are beginning to develop an urban landscape that belongs to the land, and garden designs that are more suitable to the environment of tomorrow. At last, we have Australian plants for Australian places.
