## **Despite Good Intentions Why Development Assistance To The Third World Has Failed:**

**Despite Good Intentions** Thomas W. Dichter, 2003 For more than thirty five years Thomas W Dichter has worked in the field of international development managing and evaluating projects for nongovernmental organizations directing a Peace Corps country program and serving as a consultant for such agencies as USAID UNDP and the World Bank On the basis of this extensive and varied experience he has become an outspoken critic of what he terms the international poverty alleviation industry He believes that efforts to reduce world poverty have been well intentioned but largely ineffective On the whole the development industry has failed to serve the needs of the people it has sought to help To make his case Dichter reviews the major trends in development assistance from the 1960s through the 1990s illustrating his analysis with eighteen short stories based on his own experiences in the field The analytic chapters are thus grounded in the daily life of development workers as described in the stories Dichter shows how development organizations have often become caught up in their own self perpetuation and in public relations efforts designed to create an illusion of effectiveness Tracing the evolution of the role of money as opposed to ideas in development assistance he suggests how financial imperatives have reinforced the tendency to sponsor time bound projects creating a dependency among aid recipients He also examines the rise of careerism and increased bureaucratization in the industry arguing that assistance efforts have become disconnected from important lessons learned on the ground In the end Dichter calls for a more light handed and artful approach to development assistance with fewer agencies and experts involved His stance is pragmatic rather than ideological or political What matters he says is what works and the current practices of the development industry are simply not effective *Empowerment on an Unstable Planet* Daniel C. Taylor, Carl E. Taylor, Jesse O. Taylor, 2012 This highly readable account demonstrates how a comprehensive process for social change harnesses the energy of a community and scales it up with a rising number of participants becoming invested in increasingly high quality work *The Right to Health in International Law* John Tobin, 2012-01-12 Lack of access to health care is one of the fundamental problems facing people in both developing and developed countries This book examines the history foundation and meaning of the right to health in international law It concludes that it is possible to offer an understanding of this right that is practical and capable of being implemented **Globalization: The Key Concepts** Annabelle Mooney, Betsy Evans, 2007-03-12 Viewed as a destructive force or an inevitability of modern society globalization is the focus of a multitude of disciplines A clear understanding of its processes and terminology is imperative for anyone engaging with this ubiquitous topic Globalization the Key Concepts offers a comprehensive guide to this cross disciplinary subject and covers concepts such as homogenization neo Liberalism risk knowledge society time space compression reflexivity With extensive cross referencing and suggestions for further reading this book is an essential resource for students and interested readers alike as they navigate the literature on globalization studies The New Development Management Sadhvi Dar, Professor Bill Cooke, 2013-07-18 Development management is an idea that blends the

seemingly innocuous claims of managerialism with notions of modernity and utopian ideals of third world progress This book views both phenomena as problematic and modernizing interventions In doing so it overturns and reclaims such ideas as participation community governance NGOs and civil society The contributors argue that the practices of development are often threaded together by the language of managerialism reports logframe encounters with the boss yet all of these serve to further development s disengagement from the mundane In voicing such concerns about the way development is going and about the encroachment of managerialism The New Development Management will breathe fresh life into post development debates

**A Future That's Bigger Than The Past** Samuel Wells ,2019-09-30 A Future that s Bigger than the Past sets out a vision for renewing the local church that is energising realistic and practical for small and large congregations alike In response to prevailing narratives of decline it reimagines how the church can live its vocation of receiving the abundance God gives us and sharing that abundance far and wide It recognises the surprising exuberant and plentiful things that the Holy Spirit is doing in the world and calls the church to celebrate creation enjoy culture and share in their flourishing With a rich theological foundation and borne out in the practical experience of a growing number of local church communities this groundbreaking book will enable churches to discover fresh ways in which they can become a blessing to the communities they serve

The Change Imperative Paul Ronalds,2012-03 Analysis of transnational NGOs the kinds of organizational changes they need to operate more effectively and how to achieve this change Author an experienced practitioner and manager Whether they like it or not relief and development NGOs are in the midst of a revolution Faced with the challenge of managing their growing influence in international politics these organizations are making operational decisions that will determine their survival Those that find themselves hampered by the increased politicization of aid and demands on their accountability those that struggle to define their work in a world that has only recently begun to recognize their authority will fail to meet their goals Those that are committed to flexibility learning new technologies and rethinking their strategies and structure will see their organizations succeed Author Paul Ronalds brings his experience as Deputy CEO of World Vision Australia to other NGO managers in The Change Imperative guiding them through the challenges they must overcome to maintain effectiveness in the 21st century He covers the practical issues leaders are facing in areas such as advocacy fundraising technology financing and human resources but also the more ambiguous issues legitimacy state sovereignty and political analysis Ronalds book is a must have for both students and managers pursuing influential careers in charitable development and aid organizations

*Ethical Questions and International NGOs* Keith Horton,Chris Roche,2010-03-29 In recent decades there has been a great expansion in the number size and influence of International Non Governmental Organisations INGOs involved in international relief and development These changes have led to increased scrutiny of such organisations and this scrutiny together with increasing reflection by INGOs themselves and their staff on their own practice has helped to highlight a number of pressing ethical questions such organisations face such as should INGOs attempt to

provide emergency assistance even when doing so risks helping to fuel further conflict How should INGOs manage any differences between their values and those of the people they seek to benefit How open and honest should INGOs be about their own uncertainties and failures This book consists of sustained reflections on such questions It derives from a workshop held at Melbourne University in July 2007 that brought together a group of people for the most part reflective practitioners and moral and political philosophers to discuss such questions It explores honestly some of the current challenges and dilemmas that INGOs face and also suggests some new ideas for meeting these challenges Our hope is that the kind of explicit reflection on the ethical issues INGOs face exemplified in this publication will help to promote a wider debate about these issues a debate that in turn will help INGO managers and others to make better wiser more ethically informed decisions

**The Third Sector** Meghan Kallman, Terry Clark, 2016-10-17 Civil society organizations nonprofits national and international nongovernmental organizations and a variety of formal and informal associations have coalesced into a world political force Though the components of this so called third sector vary by country their cumulative effects play an ever greater role in global affairs Looking at relief and welfare organizations innovation organizations social networks and many other kinds of groups Meghan Elizabeth Kallman and Terry Nichols Clark explore the functions impacts and composition of the nonprofit sector in six key countries Chinese organizations for example follow the predominantly Asian model of government funding that links their mission to national political goals Western groups by contrast often explicitly challenge government objectives and even gain relevance and cache by doing so In addition Kallman and Clark examine groups in real world contexts providing a wealth of political historical background in depth consideration of interactions with state institutions region by region comparisons and suggestions for how groups can borrow policy options across systems Insightful and forward seeing The Third Sector provides a rare international view of organizations and agendas driving change in today s international affairs

**Their Future** Michael Gubser, 2025-05-27 A compelling examination of how economic development projects ignore local history and the effects of this shortsightedness Foreign aid planners rarely consider the history of the societies in which they work an oversight noted in the development literature but rarely examined Aid programs costing billions of dollars operate largely in a historical vacuum divorced from the knowledge of what succeeded or failed in the past Michael Gubser chronicles the varieties of ahistoricism in international development theory and practice since 1945 He traces the history of development ideas analyzing key theoretical and policy statements to highlight the marginalization of history in favor of technical solutions to economic and social problems and he examines aid programs in several developing countries to show how Western models of social and economic development have been applied and misapplied
