Fennell, 2021-09-21 This handbook presents a timely broad ranging and provocative overview of the essential nature of ecotourism The chapters will both advance the existing central themes of ecotourism and provide challenging and divergent observations that will thrust ecotourism into new areas of research policy and practice The volume is arranged around four key themes sustainability ethics and identity change conflict and consumption and environment and learning with a total of 28 chapters The first section focuses on sustainability as a core ecotourism criterion with a primary focus on some of the macro sustainability issues that have an impact on ecotourism Foremost among these topics is the linkage to the UN s Sustainable Development Goals which have relevance to ecotourism as one of the greenest or most responsible forms of tourism The chapters in the second section provide a range of different topics that pull ecotourism research into new directions including a chapter on enriching indigenous ecotourism through culturally sensitive universalism The third section includes chapters on topics ranging from persons with disabilities as a neglected body of research in ecotourism to ecotourism as a form of luxury consumption The final section emphasises the link between ecotourism and learning about the natural world including a deeply theoretical chapter on rewilding Europe With contributions from authors around the world this handbook gives a global platform to local voices in both developed and emerging country contexts The multidisciplinary and international Routledge Handbook of Ecotourism will be of great interest to researchers students and practitioners working in tourism and sustainability

Romancing the Wild Robert Fletcher, 2014-02-24 The worldwide development of ecotourism including adventures such as mountain climbing and whitewater rafting as well as more pedestrian pursuits such as birdwatching has been extensively studied but until now little attention has been paid to why vacationers choose to take part in what are often physically and emotionally strenuous endeavors Drawing on ethnographic research and his own experiences working as an ecotour guide throughout the United States and Latin America Robert Fletcher argues that participation in rigorous outdoor activities resonates with the particular cultural values of the white upper middle class Westerners who are the majority of ecotourists Navigating 13 000 foot mountain peaks or treacherous river rapids demands deferral of gratification perseverance through suffering and a willingness to assume risks in pursuit of continuous progress In this way characteristics originally cultivated for professional success have been transferred to the leisure realm at a moment when traditional avenues for achievement in the public sphere seem largely exhausted At the same time ecotourism provides a temporary escape from the ostensible ills of modern society by offering a transcendent wilderness experience that contrasts with the indoor sedentary mental labor characteristically performed by white collar workers
