Gatherer rear and side extensions.

The rear and side gatherer extensions aid in preventing ear corn loss over the auger trough and the outer gatherer shield when operating at higher ground travel speeds, or when operating in easy snapping corn. However, when operating in badly down or leaning corn, the side extensions may have to be removed to prevent "hairpinning", or to improve efficiency in harvesting. The rear and side gatherer extensions can be used either separately or together, but must be ordered separately.
