Technical Manual ,1943 Technical Manual United States. War Department,1944 **Monthly Catalogue, United States Public Documents** ,1978 Handbook of Psychology and Sexual Orientation Charlotte Patterson,Anthony R. D'Augelli, Ph.D.,2013 The first authoritative summary of its kind in this area the Handbook of Psychology and Sexual Orientation is the primary resource for the many researchers including a new generation of investigators who are continuing to advance understanding in this field The volume editors along with other leading experts contribute an extraordinary review of contemporary psychological research and theory on sexual orientation in their specific fields of work **Technical Abstract Bulletin** ,1979 **Monthly Catalog of United States Government Publications** ,1984 NASA's University Program United States. National Aeronautics and Space Administration. Office of University Affairs,1978 *United States Government Publications Monthly Catalog* ,1947 **Handbook of Psychiatry in Palliative Medicine** Harvey Max Chochinov,William Breitbart,2009 Eight years has passed since the first edition of The Handbook of Psychiatry in Palliative Medicine was published In that time psychiatric or psychosocial palliative care has evolved the net effect on palliative medicine has been transformative Palliation that neglects psychosocial dimensions of patient and family experience de facto fails to meet contemporary standards of comprehensive palliative care While a focus on somatic issues has sometimes overshadowed attention to psychological existential and spiritual end of life challenges the past decade has seen an all encompassing multi disciplinary approach to care for the dying beginning to take hold The first comprehensive textbook of psychiatric palliative care this new edition has been fully updated reorganized and expanded to include eleven new chapters Written by 67 internationally known psychiatry and palliative care experts the book is truly an essential reference for all providers of palliative care including psychiatrists psychologists mental health counselors oncologists hospice workers and social workers Each chapter has been updated to address new therapeutic modalities and approaches as well as new research trends and opportunities for each topic **Multisensory and sensorimotor interactions in speech perception** Kaisa Tiippana,Jean-Luc Schwartz,Riikka Möttönen,2015-06-26 Speech is multisensory since it is perceived through several senses Audition is the most important one as speech is mostly heard The role of vision has long been acknowledged since many articulatory gestures can be seen on the talker's face Sometimes speech can even be felt by touching the face The best known multisensory illusion is the McGurk effect where incongruent visual articulation changes the auditory percept The interest in the McGurk effect arises from a major general question in multisensory research How is information from different senses combined Despite decades of research a conclusive explanation for the illusion remains elusive This is a good demonstration of the challenges in the study of multisensory integration Speech is special in many ways It is the main means of human communication and a manifestation of a unique language system It is a signal with which all humans have a lot of experience We are exposed to it from birth and learn it through development in face to face contact with others It is a signal

that we can both perceive and produce The role of the motor system in speech perception has been debated for a long time Despite very active current research it is still unclear to which extent and in which role the motor system is involved in speech perception Recent evidence shows that brain areas involved in speech production are activated during listening to speech and watching a talker s articulatory gestures Speaking involves coordination of articulatory movements and monitoring their auditory and somatosensory consequences How do auditory visual somatosensory and motor brain areas interact during speech perception How do these sensorimotor interactions contribute to speech perception It is surprising that despite a vast amount of research the secrets of speech perception have not yet been solved The multisensory and sensorimotor approaches provide new opportunities in solving them Contributions to the research topic are encouraged for a wide spectrum of research on speech perception in multisensory and sensorimotor contexts including novel experimental findings ranging from psychophysics to brain imaging theories and models reviews and opinions
