Chemoinformatics Hossein G. Gilani, Katia G. Samper, Reza Khodaparast Haghi, 2012-07-27 Chemoinformatics Advanced Control and Computational Techniques provides an important understanding of the main computational techniques used for processing chemical and biological structural data. The theoretical background to a number of techniques is introduced. General data analysis techniques and examination of the application techniques in the industry are presented along with current practices and current research. The book also provides practical experience of commercially available systems and includes small scale chemoinformatics related projects. The book offers scope for academics, researchers and engineering professionals. Chapters range from new methods to novel applications of existing methods and help provide an understanding of the material and or structural behavior of new and advanced systems. It includes innovative chapters on the growth of educational, scientific and industrial research activities among chemical engineers. It provides the latest coverage of chemical databases and the development of new computational methods and efficient algorithms for chemical software and chemical engineering.

Collaborative and Distributed Chemical Engineering. From Understanding to Substantial Design Process Support Manfred Nagl, Wolfgang Marquardt, 2008-07-23 IMPROVE stands for Information Technology Support for Collaborative and Distributed Design Processes in Chemical Engineering and is a large joint project of research institutions at RWTH Aachen University. This volume summarizes the results after 9 years of cooperative research work. The focus of IMPROVE is on understanding, formalizing, evaluating and consequently improving design processes in chemical engineering. In particular, IMPROVE focuses on conceptual design and basic engineering where the fundamental decisions concerning the design or redesign of a chemical plant are undertaken. Design processes are analyzed and evaluated in collaboration with industrial partners.

Lees' Loss Prevention in the Process Industries Frank Lees, 2012-11-05 Safety in the process industries is critical for those who work with chemicals and hazardous substances or processes. The field of loss prevention is and continues to be of supreme importance to countless companies, municipalities and governments around the world and Lees is a detailed reference to defending against hazards. Recognized as the standard work for chemical and process engineering safety professionals, it provides the most complete collection of information on the theory, practice, design elements, equipment, regulations and laws covering the field of process safety. An entire library of alternative books and cross referencing systems would be needed to replace or improve upon it, but everything of importance to safety professionals, engineers and managers can be found in this all encompassing three volume reference. Instead, The process safety encyclopedia, trusted worldwide for over 30 years, is now available in print and online to aid searchability and portability. Over 3 600 print pages cover the full scope of process safety and loss prevention, compiling theory, practice, standards, legislation, case studies and lessons learned in one resource as opposed to multiple sources.
