Chrysalis Maria Sibylla Merian And The Secrets Of Metamorphosis:

Chrysalis Kim Todd, 2007 Traces the life and work of the pioneering seventeenth century woman naturalist discussing her unprecedented solo expedition to study insect metamorphosis in the New World and her role in the establishment of a new branch of biology **Maria Sibylla Merian** Catherine Powell-Warren, 2025-09-09 This captivating study of the life and career of Maria Sibylla Merian focuses on her artistic output and accomplishments The career and achievements of Maria Sibylla Merian 1647 1717 are well documented A pioneering artist and scientist she spent much of her life innovating across various mediums and disciplines Her curiosity was so strong that it led her on a journey across the Atlantic Ocean from Europe to South America in pursuit of knowledge While her status as an entomologist and naturalist has garnered the most attention Merian has not yet received her full due as an artist Raised by a family of illustrators and publishers she learned how to draw mix paints create prints and paint in watercolor from her stepfather still life expert Jacob Marrel Her stepfather's attention and tutelage would provide the foundation for her talents to flourish and teach her that her gender was not a barrier to success In Maria Sibylla Merian author Catherine Powell Warren examines Merian through an art historical lens to better understand her life as a woman and illustrator in the early modern Dutch Republic This volume highlights Merian's artistic range financial successes and historical significance Considering the obstacles women artists faced in this period Merian's achievements namely her management of a successful artists studio and for profit workshop were extraordinary

Transatlantic Women Travelers, 1688-1843 Misty Krueger, 2021-03-12 This collection examines images of late seventeenth through mid nineteenth century transatlantic women travelers in historical and literary works The volume features women of a variety of races ethnicities and social classes traveling in all directions of the Atlantic Ocean as well as the people they encounter in their travels and residences *Caterpillars* Harry Berger, 2011 It is rapacious Caterpillars also explores the impact of this message on the meaning of the genre's French name We use the conventional term nature morte dead nature without giving any thought to how misleading it is Because so many portraits of still in bloom are dying it would be more accurate to name the genre nature mourant The subjects of still life are plants that are still living plants that are dying but not yet dead Book Jacket **Read On...Biography** Rick Roche, 2012-03-07 Categorizing hundreds of popular biographies according to their primary appeal character story setting language and mood and organizing them into thematic lists this guide will help readers advisors more effectively recommend titles Read On Biography Reading Lists for Every Taste is that essential go to readers advisory guide filling a gap in the growing readers advisory literature with information about 450 biography titles most published within the last decade but also including some classic titles as well The book focuses on life stories written in the third person with subjects ranging from individuals who lived in ancient times to the present day hailed from myriad nations and gained fame in diverse fields The contents are organized in order to facilitate identification of read alike and easy selection of titles according to appeal features such as character story language setting and mood

Written specifically with librarians and their patrons in mind this readers advisory title will be invaluable in public high school and college libraries **Wicked Plants** Amy Stewart, 2009-05-21 A tree that sheds poison daggers a glistening red seed that stops the heart a shrub that causes paralysis a vine that strangles and a leaf that triggered a war In *Wicked Plants* Stewart takes on over two hundred of Mother Nature's most appalling creations It's an A to Z of plants that kill maim intoxicate and otherwise offend You'll learn which plants to avoid like exploding shrubs which plants make themselves exceedingly unwelcome like the vine that ate the South and which ones have been killing for centuries like the weed that killed Abraham Lincoln's mother Menacing botanical illustrations and splendidly ghastly drawings create a fascinating portrait of the evildoers that may be lurking in your own backyard Drawing on history medicine science and legend this compendium of bloodcurdling botany will entertain alarm and enlighten even the most intrepid gardeners and nature lovers

Caterpillars in the Middle Robert J. Marquis, Suzanne Koptur, 2022-04-22 Caterpillars are excellent model organisms for understanding how multiple selective forces shape the ecology and evolution of insects and organisms in general Recent research using the tools of modern molecular biology genetics metabolomics microbial ecology experiments conducted at a global level network analysis and statistical analyses of global data sets combined with basic natural history are yielding exciting new insights into caterpillar adaptations and ecology The best way to view these research advances is within a framework of tri-trophic interactions This is a timely topic for research given the central role of caterpillars and plants in the ecology and trophic structure of terrestrial communities This book is unique in that it contains chapters from a team of experts on a diversity of key topics within caterpillar-plant interactions This volume brings together contributions by researchers from around the globe working in both tropical and temperate habitats and in human managed and more natural habitats It is a significant contribution to our understanding of insect biology and the role that insects as represented by caterpillars play in a world increasingly dominated by humans and one in which threats to insect biodiversity are mounting Chapter 11 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com The Natural History of Caterpillar-Ant Associations is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com

The Oxford Encyclopedia of Women in World History Bonnie G. Smith, 2008 The *Encyclopedia of Women in World History* captures the experiences of women throughout world history in a comprehensive 4-volume work Although there has been extensive research on women in history by region no text or reference work has comprehensively covered the role women have played throughout world history The past thirty years have seen an explosion of research and effort to present the experiences and contributions of women not only in the Western world but across the globe Historians have investigated women's daily lives in virtually every region and have researched the leadership roles women have filled across time and region They have found and demonstrated that there is virtually no historical social or demographic change in which women have not been involved and by which their lives have not been

affected The Oxford Encyclopedia of Women in World History benefits greatly from these efforts and experiences and illuminates how women worldwide have influenced and been influenced by these historical social and demographic changes The Encyclopedia contains over 1 250 signed articles arranged in an A Z format for ease of use The entries cover six main areas biographies geography and history comparative culture and society including adoption abortion performing arts organizations and movements such as the Egyptian Uprising and the Paris Commune womens and gender studies and topics in world history that include slave trade globalization and disease With its rich and insightful entries by leading scholars and experts this reference work is sure to be a valued go to resource for scholars college and high school students and general readers alike

Creating Literacy Communities as Pathways to Student Success Jessica Singer Early,Christina Saidy,2018-10-04 Creating Literacy Communities as Pathways to Student Success offers a model for using literacy as a pathway for secondary students to explore fields from which they are often systematically excluded In particular this volume demonstrates how access for young Latina students to STEM related fields can be bolstered through engagement with mentors in writing and reading programs Written for pre and in service teachers as well as scholars across disciplines this book aims to re conceptualize the ways in which writing can best serve ethnically and linguistically diverse students especially girls

The Life Sciences in Early Modern Philosophy Ohad Nachtomy,Justin E. H. Smith,2013-12-04 The present volume advances a recent historiographical turn towards the intersection of early modern philosophy and the life sciences by bringing together many of its leading scholars to present the contributions of important but often neglected figures such as Ralph Cudworth Nehemiah Grew Francis Glisson Hieronymus Fabricius ab Aquapendente Georg Ernst Stahl Juan Gallego de la Serna Nicholas Hartsoeker Henry More as well as more familiar figures such as Descartes Spinoza Leibniz Malebranche and Kant The contributions to this volume are organized in accordance with the particular problems that living beings and living nature posed for early modern philosophy the problem of life in general whether it constitutes something ontologically distinct at all or whether it can ultimately be exhaustively comprehended in the same manner as the rest the problem of the structure of living beings by which we understand not just bare anatomy but also physiological processes such as irritability motion digestion and so on the problem of generation which might be included alongside digestion and other vital processes were it not for the fact that it presented such an exceptional riddle to philosophers since antiquity namely the riddle of coming into being out of apparent or real non being and finally the problem of natural order
