Trends In Chemistry Of Materials: Selected Research Papers Of C N R Rao C N R Rao, 2008-07-21 In this collection the author has compiled a set of his papers representing some of the highlights of materials chemistry. It features a section on oxidic materials which includes high temperature superconductivity colossal magnetoresistance electronic phase separation and multiferroics. The author has also included novel methods for making gallium nitride boron nitride and such materials by using precursors and the urea decomposition route. Moreover, there is a section dealing with open framework and hybrid materials of which the latter has a great future since one can make use of the rigidity of inorganic structures and the functionality and flexibility of the organic residues to design materials with novel properties. Chemistry of Nanomaterials C. N. R. Rao, 2014 The book comprises a collection of reprints representing the current state of research in nanomaterials covering all the frontier areas. It will be an invaluable resource for new researchers and students and could also serve as an inspiration for fresh ideas. Academics, students and practitioners in this subject will certainly benefit from the contents.

Solid State Chemistry: Selected Papers Of C N R Rao S K Joshi, Ragunath A Mashelkar, 1995-02-28 Solid State Chemistry today is a frontier area of mainstream chemistry and plays a vital role in the development of materials. The present work consisting of a selection of Prof C N R Rao's papers covers most of the important aspects of solid state chemistry and provides the flavor of the subject showing how the subject has evolved over the years. Trends in Chemistry of Materials Chintamani Nagesa Ramachandra Rao, 2008 In this collection the author has compiled a set of his papers representing some of the highlights of materials chemistry. Einstein paid a compliment to Mahatma Gandhi on his 70th birthday. He said, "Generations to come it may well be will scarce believe that such a man as this one ever in flesh and blood walked upon this earth." At Prof Rao's 85th birthday, I would like to repeat these words. Prof Rao is not an individual; he is an institution; he is a phenomenon. I feel lucky that our generations could see him, touch him, feel him, experience him, learn from him, and get inspired by him. I have watched Prof Rao as a scientist, as a science leader, as a science institution builder, and indeed as a leader of leaders of science. I have also watched him as a wonderful, warm-hearted human being with abundance of empathy. I have seen his child-like enthusiasm. I have watched him as courage personified. Dr. R. A.
