Digital Play Digital Play:

Digital Play Stephen Kline, Nick Dyer-Witheford, Greig De Peuter, 2003 In a marketplace that demands perpetual upgrades the survival of interactive play ultimately depends on the adroit management of negotiations between game producers and youthful consumers of this new medium The authors suggest a model of expansion that encompasses technological innovation game design and marketing practices Their case study of video gaming exposes fundamental tensions between the opposing forces of continuity and change in the information economy between the play culture of gaming and the spectator culture of television the dynamism of interactive media and the increasingly homogeneous mass mediated cultural marketplace and emerging flexible post Fordist management strategies and the surviving techniques of mass mediated marketing Digital Play suggests a future not of democratizing wired capitalism but instead of continuing tensions between access to and enclosure in technological innovation between inertia and diversity in popular culture markets and between commodification and free play in the cultural industries publisher description Digital Play Therapy Jessica Stone, 2021-12-28 The newly updated Digital Play Therapy focuses on the responsible integration of technology into play therapy during and after the COVID 19 pandemic With respect for the many different modalities and approaches under the play therapy umbrella this book incorporates therapist fundamentals play therapy tenets and practical information for the responsible integration of digital tools into play therapy treatment All chapters have been updated and new chapters discuss strategies for using teletherapy effectively during and beyond the pandemic This revised edition provides a solid grounding both for clinicians who are brand new to the incorporation of digital tools as well as for those who have already begun to witness digital play therapy's power Digital Play in Early Childhood Mona Sakr, 2019-09-30 Critically examining the fears that commonly surround young children's play involving digital technologies this book seeks to address each of the negatives and present the positive possibilities of technology when it comes to early childhood Using observations of children in play and cutting edge research this book will empower students and build their confidence so that they are able to challenge perceptions and think creatively about how they can use technology Each chapter includes case studies research spotlights activities and annotated further reading to help students develop their critical thinking deepen their research and connect theory with practice Designing Learning with Digital Play Fei Victor Lim, Weimin Toh, 2025-12-15 Lim and Toh provide updates on recent research on digital play and learning and unite game based learning with multimodal and social semiotic theories They adopt the position that teachers or caregivers scaffolding is required when games are used in a pedagogical context such as the classroom The book offers a nuanced view of the nature and properties of games beyond motivation including the students interest and use of digital play The chapters explore the varied ways in which games are designed to promote critical thinking and reflection It expands on the teachers or caregivers scaffolding of students digital play in pedagogical contexts such as in a classroom setting where students are guided to reflect on how they perceive the

representations in the game world With this openness and interest towards digital play the authors argue that it is timely for us to examine the value of digital play for learning that it can foster literacy development as well as promote growth in the affective domain They echo the call for design principles in digital play to inform the design of students learning experiences and explore ways in which digital play can be integrated into teaching and learning This book covers a topic which is both relevant and urgent in today's digital age Of interest to anyone involved in designing learning with digital play this volume will be of particular value to students and scholars in education curriculum design pedagogy as well as multimodality

Digital Play and Technologies in the Early Years Christine Stephen, Liz Brooker, Pamela Oberhuemer, Rod Parker-Rees, 2020-04-24 Technologies are a pervasive feature of contemporary life for adults and children However young children's experiences with digital technologies are often the subject of polarised debate among parents educators policymakers and social commentators particularly since the advent of tablets and smartphones changed access to the Internet and the nature of interactions with digital resources Some are opposed to children's engagement with digital resources concerned that the activities they afford are not developmentally appropriate limit physical activity and restrict the development of social skills Others welcome digital technologies which they see as offering new and enhanced ways of learning and sharing knowledge Despite this level of popular and policy interest in young children's interactions with digital technologies our understanding of the influence of these technologies on playing and learning and on the role of educators has remained surprisingly limited The contributions to this book fill in the gaps of our existing understanding of the field They focus on children and families from Australia to England to Estonia the how and why of encounters with digital technologies the nature of digital play and questions about practice and practitioners The book raises critical questions and offers new understandings and theoretical insights around one of the hot topics in early years research This book was originally published as a special issue of the Early Years journal

Digital Play in Early Childhood Mona Sakr, 2019-12-09 Critically examining the fears that commonly surround young children's play involving digital technologies this book seeks to address each of the negatives and present the positive possibilities of technology when it comes to early childhood Using observations of children in play and cutting edge research this book will empower students and build their confidence so that they are able to challenge perceptions and think creatively about how they can use technology Each chapter includes case studies research spotlights activities and annotated further reading to help students develop their critical thinking deepen their research and connect theory with practice

Information, Communication and Engineering Teen Hang Meen, 2013-02-27 Selected peer reviewed papers from the 2012 International Conference on Information Communication and Engineering ICICE 2012 December 15-20 2012 Fuzhou Taiwan

Informal Learning and Digital Media Kirsten Drotner, Hans Siggaard Jensen, Kim Schrøder, 2008 The book provides an engaging overview of the ways in which digital media impact on current understandings of informal learning and it offers a range of grounded studies of the changing

relations between digital media and informal learning processes with a particular focus on young people A variety of international scholars examine these processes across a number of sites and settings from Japan to Finland and the USA and they discuss their implications for education ICT and media The volume is an ideal resource for graduate students as well as for practitioners and policy makers

Digital Playgrounds Sara Grimes, 2021 Digital Playgrounds explores the key developments trends debates and controversies that have shaped children's commercial digital play spaces over the past two decades It argues that children's online playgrounds virtual worlds and connected games are much more than mere sources of fun and diversion they serve as the sites of complex negotiations of power between children parents developers politicians and other actors with a stake in determining what how and where children's play unfolds Through an innovative transdisciplinary framework combining science and technology studies critical communication studies and children's cultural studies Digital Playgrounds focuses on the contents and contexts of actual technological artefacts as a necessary entry point for understanding the meanings and politics of children's digital play The discussion draws on several research studies on a wide range of digital playgrounds designed and marketed to children aged six to twelve years revealing how various problematic tendencies prevent most digital play spaces from effectively supporting children's culture rights and ironically play Digital Playgrounds lays the groundwork for a critical reconsideration of how existing approaches might be used in the development of new regulation as well as best practices for the industries involved in making children's digital play spaces In so doing it argues that children's online play spaces be reimagined as a crucial new form of public sphere in which children's rights and digital citizenship must be prioritized
