The Cambridge Handbook of Formal Semantics Maria Aloni, Paul Dekker, 2016-07-07 Formal semantics the scientific study of meaning in natural language is one of the most fundamental and long established areas of linguistics This Handbook offers a comprehensive yet compact guide to the field bringing together research from a wide range of world leading experts Chapters include coverage of the historical context and foundation of contemporary formal semantics a survey of the variety of formal logical approaches to linguistic meaning and an overview of the major areas of research within current semantic theory broadly conceived The Handbook also explores the interfaces between semantics and neighbouring disciplines including research in cognition and computation This work will be essential reading for students and researchers working in linguistics philosophy psychology and computer science

Computational Linguistics: Studies in Natural Language Processing Elsa Harrington, 2021-11-16 Computational linguistics refers to the scientific study of language from a computational perspective It is an interdisciplinary field that makes use of concepts from computer science linguistics logic artificial intelligence philosophy and cognitive science Natural language processing deals with the study of interactions between human language and computers It also involves the programming of computers for the processing and analysis of large amounts of natural language data There are theoretical and applied components of linguistics Theoretical computational linguistics involves the development of formal theories related to grammar and semantics Within applied computational linguistics the statistical methods and machine learning algorithms are applied to natural language processing tasks This book studies analyses and upholds the pillars of computational linguistics and its utmost significance in modern times It provides significant information of this discipline to help develop a good understanding of computational linguistics and related fields This book will provide comprehensive knowledge to the readers

Handbook of Natural Language Processing Robert Dale, Hermann Moisl, Harold Somers, 2000-07-25 This study explores the design and application of natural language text based processing systems based on generative linguistics empirical corpus analysis and artificial neural networks It emphasizes the practical tools to accommodate the selected system

Foundations of Intensional Semantics Chris Fox, Shalom Lappin, 2008-04-15 This book provides a systematic study of three foundational issues in the semantics of natural language that have been relatively neglected in the past few decades focuses on the formal characterization of intensions the nature of an adequate type system for natural language semantics and the formal power of the semantic representation language proposes a theory that offers a promising framework for developing a computational semantic system sufficiently expressive to capture the properties of

natural language meaning while remaining computationally tractable written by two leading researchers and of interest to students and researchers in formal semantics computational linguistics logic artificial intelligence and the philosophy of language

Language, Cohesion and Form Margaret Masterman, 2005-01-16 Margaret Masterman was a pioneer in the field of computational linguistics Working in the earliest days of language processing by computer she believed that meaning not grammar was the key to understanding languages and that machines could determine the meaning of sentences She was able even on simple machines to undertake sophisticated experiments in machine translation and carried out important work on the use of semantic codings and thesauri to determine the meaning structure of texts This volume brings together Masterman's groundbreaking papers for the first time Through his insightful commentaries Yorick Wilks argues that Masterman came close to developing a computational theory of language meaning based on the ideas of Wittgenstein and shows the importance of her work in the philosophy of science and the nature of iconic languages Of key interest in computational linguistics and artificial intelligence it will remind scholars of Masterman's significant contribution to the field

Formal Analysis for Natural Language Processing: A Handbook Zhiwei Feng, 2023-05-09 The field of natural language processing NLP is one of the most important and useful application areas of artificial intelligence NLP is now rapidly evolving as new methods and toolsets converge with an ever expanding wealth of available data This state of the art handbook addresses all aspects of formal analysis for natural language processing Following a review of the field's history it systematically introduces readers to the rule based model statistical model neural network model and pre training model in natural language processing At a time characterized by the steady and vigorous growth of natural language processing this handbook provides a highly accessible introduction and much needed reference guide to both the theory and method of NLP It can be used for individual study as the textbook for courses on natural language processing or computational linguistics or as a supplement to courses on artificial intelligence and offers a valuable asset for researchers practitioners lecturers graduate and undergraduate students alike

Linguistics: The Cambridge Survey: Volume 2, Linguistic Theory: Extensions and Implications Frederick J. Newmeyer, 1988-04-21 Linguistics The Cambridge Survey is a comprehensive introduction to prevalent research in all branches of the field of linguistics from syntactic theory to ethnography of speaking from signed language to the mental lexicon from language acquisition to discourse analysis Each chapter has been written by a specialist particularly distinguished in his or her field who has accepted the challenge of reviewing the current issues and future prospects in sufficient depth for the scholar and with sufficient clarity for the student Each volume can be read independently and has a particular focus Volume I covers the internal structure of the language faculty itself while Volume II considers the evidence for and the implications of a generativist approach to language Psycholinguistics and neurolinguistics are covered in Volume III and Volume IV concentrates on sociolinguistics and the allied fields of anthropological linguistics and discourse and conversation analysis Several of the chapters in the work concentrate on the interface between different

aspects of linguistic theory or the boundaries between linguistic theory and other disciplines Thus in both its scope and in its approach the Survey is a unique and fundamental work of reference It undoubtedly fulfils the editor s principal aim of providing a wealth of information insight and ideas that will excite and challenge all readers with an interest in linguistics

Shall We Play the Festschrift Game? Diana Santos, Krister Lindén, Wanjiku Ng'ang'a, 2012-08-14 There are not many people who can be said to have influenced and impressed researchers in so many disparate areas and language geographic fields as Lauri Carlson as is evidenced in the present Festschrift His insight and acute linguistic sensitivity and linguistic rationality have spawned findings and research work in many areas from non standard etymology to hardcore formal linguistics not forgetting computational areas such as parsing terminological databases and last but not least machine translation In addition to his renowned and widely acknowledged insights in tense and aspect and its relationship with nominal quantification and his ground breaking work in dialog using game theoretic machinery Lauri has in the last fifteen years as Professor of Language Theory and Translation Technology contributed immensely to areas such as translation terminology and general applications of computational linguistics The three editors of the present volume have successfully performed doctoral studies under Lauri s supervision and wish with this volume to pay tribute to his supervision and to his influence in matters associated with research and scientific linguistic and philosophical inquiry as well as to his humanity and friendship
