1907-1960 Robert Frank Futrell,1971 *Tank Gun Systems* William Andrews,2023-06-30 Much has been written about the

use of tanks in battle Little however has appeared about the gunnery systems that are at their core This book describes and examines the main gun systems of medium and heavy tanks from first use in 1916 in World War I to those fielded in numbers to the end of World War II in 1945 including tanks of the interwar period Specifically considered are guns of a caliber greater than 35 mm which have been deployed in numbers greater than 100 The emphasis is on guns mounted in turrets on heavier tracked armored fighting vehicles greater than 15 tonnes which were considered tanks There are though exceptions in that the naval 6 pounder guns in First World War British tanks as well as the 75 mm guns in French medium tanks of the same period all turretless are included The treatment of gun systems includes sighting and fire control equipment gun laying equipment mounts and the array of munitions fired as well as the actual gun including its barrel cradle breech firing mechanism sights and recoil system Related to this are issues of gun handling loading and unloading ammunition design and rates of fire Also examined are the maximum impulse and energy generated by firing some of the munitions available that must be absorbed by the gun recoil system The United States Catalog Eleanor E. Hawkins,1921 **A Practical Guide for the Formation and Management of District and Parochial Branches of the Church of England Temperance Society** Thomas Dixon Spain,1891 **The United States Catalog** ,1921 *Shaping American Military Capabilities after the Cold War* Richard Lacquement,2003-02-28 For more than 40 years U S defense policy and the design of military capabilities were driven by the threat to national security posed by the Soviet Union and its allies As the Soviet Union collapsed analysts wondered what effect this dramatic change would have upon defense policy and the military capabilities designed to support it Strangely enough this development would ultimately have little effect on our defense policy Over a decade later American forces are a smaller but similar version of their Cold War predecessors The author argues that despite many suggestions for significant change the bureaucratic inertia of comfortable military elites has dominated the defense policy debate and preserved the status quo with only minor exceptions This inertia raises the danger that American military capabilities will be inadequate for future warfare in the information age In addition such legacy forces are inefficient and inappropriately designed for the demands of frequent and important antiterrorist and peace operations Lacquement offers extensive analysis concerning the defense policymaking process from 1989 to 2001 including in particular the 2001 Quadrennial Defense Review This important study also provides a set of targeted policy recommendations that can help solve the identified problems in preparing for future wars and in better training for peace operations
