Max Horkheimer

Theodor W. Adorno

“In the most general sense of progressive thought, the Enlightenment has always aimed at liberating men from fear and establishing their sovereignty. Yet the fully enlightened earth radiates under the sign of disaster triumphant.”

to Critical Theory language English abstract While we live in a post modern World having the age of Enlightenment the eighteenth century far in our rear view mirror the concept of Enlightenment is still a basic philosophical task Its origin its constitution and its goal are wildly disputed unknown or undefined whatever point of view might here be adequate Still Enlightenment is seen to be a determining part of human nature of what we are what we think what we do Foucault p 32 We still live and an interesting question here would be will we always live within the shadow of the eighteenth century Enlightenment even though the new era of modernity or post modernity has been introduced Since Enlightenment dissolve d the injustice of the old inequality Adorno p 12 of church nobility Bourgeoisie and the people of mastery and serfdom with reason as its mediator we face the problem of its side effects and its results and most importantly its limits Must man define his border to experience freedom which is still within limits though they are not consciously felt if these limits are wide enough or can he overcome a reasonable reason in some way Alternatively has institutionalised knowledge with the help of religion established a building of ideologies¹ that is of eternal character This leads to the question of possible exits from Enlightenment which already happens to have been a way out Foucault p 34 from immaturity but is now mutilated to a new prison of human beings in post modernity Is the human mind ever to reach a state of nirvana or its secular utopia a never available dream world liberty of universals the ultimate freedom Will man ever be able to come back to paradise now that he has eaten from the tree of knowledge Kantos p 239 This essay tries to elaborate on the post modern view of Enlightenment through the perspective of Adorno and Horkheimer s Dialectic of Enlightenment and the contrary perspective of Foucault s essay What is Enlightenment Dialectic of Enlightenment Max Horkheimer,Theodor W. Adorno,2020 Dialectic of Enlightenment is undoubtedly the most influential publication of the Frankfurt School of Critical Theory Written during the Second World War and circulated privately it appeared in a printed edition in Amsterdam in 1947 What we had set out to do the authors write in the Preface was nothing less than to explain why humanity instead of entering a truly human state is sinking into a new kind of barbarism Yet the work goes far beyond a mere critique of contemporary events Historically remote developments indeed the birth of Western history and of subjectivity itself out of the struggle against natural forces as represented in myths are connected in a wide arch to the most threatening experiences of the present The book consists in five chapters at first glance unconnected together with a number of shorter notes The various analyses concern such phenomena as the detachment of science from practical life formalized morality the manipulative nature of entertainment culture and a paranoid behavioral structure expressed in aggressive anti-Semitism that marks the limits of enlightenment The authors perceive a common element in these phenomena the tendency toward self destruction of the guiding criteria inherent in enlightenment thought from the beginning Using historical analyses to elucidate the present they show against the background of a prehistory of subjectivity why the National Socialist terror was not an aberration of modern history but was rooted deeply in the fundamental characteristics of Western civilization Adorno and Horkheimer see the self destruction

of Western reason as grounded in a historical and fateful dialectic between the domination of external nature and society. They trace enlightenment which split these spheres apart back to its mythical roots. Enlightenment and myth therefore are not irreconcilable opposites but dialectically mediated qualities of both real and intellectual life. Myth is already enlightenment and enlightenment reverts to mythology. This paradox is the fundamental thesis of the book. This new translation based on the text in the complete edition of the works of Max Horkheimer contains textual variants, commentary upon them, and an editorial discussion of the position of this work in the development of Critical Theory.

How to Read Adorno and Horkheimer's Dialectic of Enlightenment Nicholas R. R. Lawrence, 2015-04-22

Theodor Adorno and Max Horkheimer's *Dialectic of Enlightenment* is a formative text in the canon of critical theory and a classic of twentieth-century thought. Nick Lawrence's excellent guide aids students in their study of this central work. We now take for granted that the so-called enlightenment is a complicated and contested idea, yet Adorno and Horkheimer were among the first to argue that rational and progressive discourse premised on the goal of controlling nature and liberating humanity from fear can carry within it the seeds of regression. This book introduces students to the context within which *Dialectic of Enlightenment* was written, giving special attention to the intellectual debates surrounding its composition. Key concepts from the text, such as enlightenment, myth, and the domination of nature, are described and contextualized. This book is an invaluable tool for students and lecturers who need to engage with this key text.

Sample Book Insights

- 1 The Odyssey is a prime example of the intertwinement of myth and rational labor. It illustrates the dialectic of enlightenment as it shows clear links to myth, but it also contradicts those myths. The epic creates a universality of language, but it also disintegrates the hierarchical order of society.
- 2 The German late Romantic interpretation of antiquity, based on the early writings of Nietzsche, recognized the element of bourgeois enlightenment in Homer. However, they saw this element as both positive and negative and tried to liquidate it.
- 3 The most prominent and therefore the most impotent of the esoteric apologists of German heavy industry, Rudolf Borchardt, prematurely breaks off his analysis in the service of repressive ideology. He fails to recognize that the primal powers he extols themselves represent a stage of enlightenment.
- 4 The Odyssey is closer in form to the picaresque novel. The hero's peregrinations from Troy to Ithaca trace the path of the self through myths, a self that is infinitely weak compared to the force of nature and still in the process of formation as self-consciousness.

Odysseus, Hero of Practical Intelligence Jeffrey Barnouw, 2004-10-05

In dramatic representations and narrative reports of inner deliberation, the Odyssey displays the workings of the human mind, and its hero's practical intelligence epitomized by anticipating consequences and controlling his actions accordingly. Once his hope of returning home as husband, father, and king is renewed on Calypso's isle, Odysseus shows a consistent will to focus on this purpose and subordinate other impulses to it. His fabled cleverness is now fully

engaged in a gradually emerging plan as he thinks back from that final goal through a network of means to achieve it. He relies on signs inferences in the form if this then that as defined by the Stoic Chrysippus and the nature of his intelligence is thematically underscored through contrast with others' recklessness that is failure to heed signs or reckon consequences. In Homeric deliberation the mind is torn between competing options or intentions not between reason and desire. The lack of distinct opposing faculties and hierarchical organization in the Homeric mind far from archaic simplicity prefigures the psychology of Chrysippus who cites deliberation scenes from the *Odyssey* against Plato's hierarchical tripartite model. From the Stoics there follows a psychological tradition leading through Hobbes and Leibniz to Peirce and Dewey. These thinkers are drawn upon to show the significance of the conception of thinking first articulated in the *Odyssey*. Homer's work inaugurates an approach that has provoked philosophical conflict persisting into the present and opposition to pragmatism and Pragmatism can be discerned in prominent critiques of Homer and his hero which are analyzed and countered in this study.
