Chimpanzee Politics Power And Sex Among Apes:

Chimpanzee Politics Frans B. M. Waal, 2000-04-10 The first edition of Frans de Waal's *Chimpanzee Politics* was acclaimed not only by primatologists for its scientific achievement but also by a much broader audience of politicians business leaders and social psychologists for its remarkable insights into very basic human needs and behaviors In this revised edition featuring a new gallery of color photographs along with a new introduction and epilogue de Waal expands and updates his story of the Arnhem colony and its continuing political upheavals We learn the fate of many memorable chimpanzees and meet the colony's current leaders and their allies The new edition remains a detailed and thoroughly engrossing account of sexual rivalries and coalitions of actions governed by intelligence rather than instinct and it reaffirms the complex bond between humans and their closest living relatives As we watch the chimpanzees of Arnhem behave in ways we recognize from Machiavelli and from the nightly news de Waal reminds us again that the roots of politics are older than humanity

Pilbeam, 2017-11-27 Knowledge of wild chimpanzees has expanded dramatically This volume edited by Martin Muller Richard Wrangham and David Pilbeam brings together scientists who are leading a revolution to discover and explain human uniqueness by studying our closest living relatives Their conclusions may transform our understanding of human evolution

The Mind of the Chimpanzee Elizabeth V. Lonsdorf, Stephen R. Ross, Tetsuro Matsuzawa, 2010-08-15 Understanding the chimpanzee mind is akin to opening a window onto human consciousness Many of our complex cognitive processes have origins that can be seen in the way that chimpanzees think learn and behave The Mind

of the Chimpanzee brings together scores of prominent scientists from around the world to share the most recent research into what goes on inside the mind of our closest living relative Intertwining a range of topics including imitation tool use face recognition culture cooperation and reconciliation with critical commentaries on conservation and welfare the collection aims to understand how chimpanzees learn think and feel so that researchers can not only gain insight into the origins of human cognition but also crystallize collective efforts to protect wild chimpanzee populations and ensure appropriate care in captive settings With a breadth of material on cognition and culture from the lab and the field The Mind of the Chimpanzee is a first rate synthesis of contemporary studies of these fascinating mammals that will appeal to all those interested in animal minds and what we can learn from them

The Hominid Individual in Context Clive Gamble, Martin Porr, 2005 Rather than explaining the archaeology of stones and bones as the product of group decisions the contributors investigate how individual action created social life This challenge to the accepted standpoint of the Palaeolithic brings new models and theories into the period innovations that are matched by the resolution of the data that preserve individual action among the artefacts The book brings together examples from recent excavations at Boxgrove Schoningen and Blombos Cave and the analyses of findings from Middle and Early Upper Pleistocene excavations in Europe Africa and Asia The results will revolutionise the Palaeolithic as archaeologists search for the lived lives among the empty spaces that remain BOOK JACKET
