Concepts In Integrated Pest Management:

Concepts in Integrated Pest Management Norris, Caswell-Chen & Kogan, 2003 **Integrated Pest Management** Edward B. Radcliffe, William D. Hutchison, Rafael E. Cancelado, 2009 This textbook presents theory and concepts in integrated pest management complemented by two award winning websites covering more practical aspects Concepts of Integrated Pest Management (IPM) for New Mexico Charles Richard Ward, New Mexico State University. Cooperative Extension Service, 1993 *Concepts of Integrated Pest Management in Washington* D. F. Mayer, Washington State University. Cooperative Extension, 1991 *Concepts of Integrated Pest Management in Washington* Daniel Fredrick Mayer, 1991 Concepts of Integrated Pest Management in Washington D. F. Mayer, Washington State University. Cooperative Extension Service, C. Johansen, Washington State University. Extension, D. Johnson, United States. Department of Agriculture, 1980 General Concepts in Integrated Pest and Disease Management A. Ciancio, K.G. Mukerji, 2007-07-20 The proposal for this series originated during a short term visit of Professor Mukerji to the Plant Protection Institute of CNR at Bari Italy in November 2005 Both editors agreed on the need to produce a volume focusing on recent advances and achievements which changed the practice of crop protection in the last decade The opera rapidly evolved towards a long term editorial endeavour yielding a multi disciplinary series of five volumes In view of environmental and health concerns a determined effort is currently made in almost any agroecosystem in the world to reduce and rationalize the use of chemicals pesticides fungicides nematocides etc and to manage pests pathogens more effectively This consciousness is not only related to the need of nourishing a still growing world population but also derives from the impact of side effects of farming like soil water and environmental contamination calling for a responsible conservation of renewable resources There are increasing expectations at the producers and consumers levels concerning low inputs agriculture and residues free food Disciplines like IPM IDM integrated pest management integrated disease management are now central to the science and technology of crop protection In the classical version of IPM IDM a pesticide fungicide is applied only when the pathogen population reaches a level that would lead to economic losses in the crop In other words classical IPM IDM concentrates on reducing the numbers of noxious organisms through the application of agrochemicals *Integrated Pest Management* G. S. Dhaliwal, Ramesh Arora, 2001 *Concepts of Integrated Pest Management in Washington* Daniel Fredrick Mayer, 1980 **Integrated Pest Management** Dharam P Abrol, 2013-08-28 Integrated Pest Management Current Concepts and Ecological Perspective presents an overview of alternative measures to traditional pest management practices using biological control and biotechnology The removal of some highly effective broad spectrum chemicals caused by concerns over environmental health and public safety has resulted in the development of alternative reduced risk crop protection products These products less toxic to the environment and easily integrated into biological control systems target specific life stages or pest species Predation recognized as a suitable long term strategy effectively suppresses pests in biotechnological control systems

Integrated Pest Management covers these topics and more. It explores the current ecological approaches in alternative solutions such as biological control agents, parasites and predators, pathogenic microorganisms, pheromones and natural products as well as ecological approaches for managing invasive pests, rats, suppression of weeds, safety of pollinators, role of taxonomy and remote sensing in IPM and future projections of IPM. This book is a useful resource to entomologists, agronomists, horticulturists and environmental scientists. It fills a gap in the literature by providing critical analysis of different management strategies that have a bearing on agriculture sustainability and environmental protection. It synthesizes research and practice on integrated pest management. It emphasizes an overview of management strategies with critical evaluation of each in the larger context of ecologically based pest management.
