Elementary Algebra John C. Stone, 2017-01-20 **Elementary Algebra** Cajori, 2017-09-15 Excerpt from Elementary Algebra First Year Course The sign of multiplication $\times$ is often replaced in algebra by a dot $\cdot$ which is written above the line to distinguish it from a decimal point Thus $3 \cdot 4$ means 3×4 The product of two numbers one or both of which are represented by letters is usually indicated by writing the numbers one after the other without any Sign between them Thus ab means $a \times b$ or $a \cdot b$ $4c$ means $4 \times c$ or $4 \cdot c$ When only one of two numbers is represented by a letter it is customary to write the letter last Thus we write $4c$ but not $c4$ About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Elementary Algebra Cajori, 2017-09-15 Excerpt from Elementary Algebra Second Year Course This book contains a brief review of the fundamental operations of algebra followed by a thorough presentation of the topics usually included in the work of the third half year The material is so arranged that the choice of topics for review or advance study may be easily made The book contains not only a large number of practical problems but also practical applications of graphs Material for drill in the manipulation of exponents and radicals will be found in Chapter VII Great pains have been taken to make the subject of logarithms accessible to beginners The most difficult part in learning to compute with logarithms is the process of interpolation Of the various arrangements of logarithmic tables which have been suggested we have selected the one which renders interpolation easiest The chapter on logarithms is introduced earlier than usual on account of the great practical importance of the subject If desired it can be taken up later after Chapter VI The concept of a function does not receive isolated and abstract treatment it is presented as a fundamental idea in proportion variation and graphics Its connection

with problems of everyday life is firmly established The aims of the First Year Book have been kept in view in the preparation of this text Emphasis is thrown upon clear ness of exposition and the use of expressions which recall the axiomatic processes involved Continued stress has been laid upon oral exercises Several of the practical problems given in the text were suggested by the perusal of an English book T Percy Nunn s Exercises in Algebra including Trigonometry Part I 1913 About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Practical Elementary Algebra (Classic Reprint) Jos; V. Collins, 2015-08-04 Excerpt from Practical Elementary Algebra This book meets the requirements of the College Entrance Board and contains besides chapters on logarithms and on the application of algebra in science and higher mathematics as a preparation for technical schools It has been written as the title indicates with the object of making elementary algebra possess more practical value both in the ordinary and also in the cultural or educational sense of the word It is written as well for those who do not go to college as for those who do A wave of interest in mathematical teaching has swept over the United States during the past five or six years receiving an impetus from the Perry movement in England Numerous organizations of teachers have been formed and quite a literature has been built up in the publications of these societies The author has studied this literature carefully and utilized its suggestions freely The whole field of exercises has been eagerly searched for more practical problems and a considerable number of new ones has been introduced The belief is expressed that with this training in solving such problems the student will be much more likely to apply his algebra to everyday affairs and in advanced studies than without it The progress of the student through the formal parts of the subject is made easy and rapid As far as possible the snags and pitfalls have been removed and the path has been made plain and open The algebraic notation is wonderfully compact and shorthandlike and its complexities should not be forced on young minds too early Much of the pleasure in the study consists in the easy and facile doing of the work assigned With the difficult exercises obscure explanations and unnecessary definitions cut out rapid progress can be made The topics are presented in such a way that in case any are imperfectly developed or left unfinished in class the average student can get the help he needs from the book About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of
