Crime, Violence, and Global Warming John Crank, Linda Jacoby, 2015-05-20 *Crime Violence and Global Warming* introduces the many connections between climate change and criminal activity Conflict over natural resources can escalate to state and non state actors resulting in wars asymmetrical warfare and terrorism Crank and Jacoby apply criminological theory to each aspect of this complicated web helping readers to evaluate conflicting claims about global warming and to analyze evidence of the current and potential impact of climate change on conflict and crime Beginning with an overview of the science of global warming the authors move on to the links between climate change scarce resources and crime Their approach takes in the full scope of causes and consequences present and future in the United States and throughout the world The book concludes by looking ahead at the problem of forecasting future security implications if global warming continues or accelerates This fresh approach to the criminology of climate change challenges readers to examine all sides of this controversial question and to formulate their own analysis of our planet s future

Climate Change from a Criminological Perspective Rob White, 2012-06-12 Few would dispute the power of climate change to lead to profoundly destructive weather events At the same time the possibility of climate change as a consequence or even a cause of criminal events is far less recognized As the earth grows warmer issues regarding land use water rights bio security and food production and distribution will continue to have far reaching impact and produce more opportunity for offenses by individuals and groups as well as political and corporate entities In *Climate Change from a Criminological Perspective* a panel of pioneering green criminologists investigates an increasingly complex chain of ecological causes and effects Illegal acts are analyzed as they contribute to environmental decline e g wildlife poaching or result from ecological distress e g survival related theft Regulatory and other interventions are critiqued concepts of environmental harm refined and new research methodologies called for And while individual events described are mainly local the contributors keep the global picture and substantial questions about human

rights and social relationships firmly in mind Topics featured include Global warming as corporate crime Climate change and the courts U S and global views Climate change natural disasters and gender inequality The roles and responsibilities of environmental enforcement networks A sociocultural perspective on climate change denial PLUS instructive in depth chapters on criminological aspects of Hurricane Katrina and the Japanese nuclear disaster A volume of considerable timeliness and vision Climate Change from a Criminological Perspective will be read and discussed and will inspire action by researchers in criminology criminal justice environmental studies and related disciplines as well as policymakers **Carbon Criminals, Climate Crimes** Ronald C. Anderson,2022-03-03 Much of the current rhetoric surrounding climate change focuses on the physical changes to the environment and the resulting material damage to infrastructure and resources Although there has been some dialogue about secondary effects namely mass migration little effort has been given to understanding how rapid climate change is affecting people on group and individual levels In this Element we examine the psychological impacts of climate change especially focused on how it will lead to increases in aggressive behaviors and violent conflict and how it will influence other aspects of human behavior We also look at previously established psychological effects and use them to help explain changes in human behavior resulting from rapid climate change as well as to propose actions that can be taken to reduce climate change itself and mitigate harmful effects on humans
