Crises In Modern Times A Message To The World:

Qualitative Research in the Post-Modern Era Karyn Cooper, Robert E. White, 2011-11-17 Qualitative Research is changing as a result of postmodern influences which have changed the way research is interpreted and understood This has prompted questions which have been knocking at the door of qualitative research for some time now Who is the researcher in this research account How does the researcher relate to his/her research How can the researcher who reads qualitative research relate to and understand the nuances and complexities in qualitative research How can this volume help us to not only describe effect and manage change but help us to understand imagine and affect policies practices and procedures related to research What can we learn from researchers at the top of their stride who have struggled in order to develop qualitative research The book includes illustrative interviews with world famous scholars William Pinar Norman Denzin Henry Giroux Zygmunt Bauman and Maxine Greene invite the student to engage reflectively and to figure out the rudiments and connections of research methodology and methods for theses The developed so called The Five Contexts serves as a theoretical framework for conducting understanding and interpreting qualitative research in a variety of disciplines in this post modern era The Future of God Carl E. Braaten, 2016-10-19 A recent movement in modern religious thought believes that the place to start in theology is at the end eschatology At a critical time in history when many are unsure of the future of faith in a secular age here is a call for believers to participate in God's activity in the future tense The basic theme in these pages is the idea of the future in the language of Christian hope and in the interpretation of history The rediscovery of the role of eschatology in the preaching of Jesus and of early Christians says Dr Braaten has been one of the most important events of recent theological history Eschatology has not always been taken seriously Theologians have often defined it so that the dimension of the future was allowed to slip into an eternal present God was thus viewed only in vertical terms as being above us The author feels that this loss of hope in the future precipitated the crisis known as the death of God movement In this book Dr Braaten joins those thinkers who are looking to eschatology as a point of departure for a total recasting of the Christian message He presents a constructive and systematic outline of the theology of the future and puts forth an understanding of God shared with early Christianity as being ahead of us The thrust of this theology of the future is an ethic of revolutionary change derived from the Christian vision of the kingdom of God Christianity's eschatological faith is shown to be closely connected to the revolutionary concerns of the modern world both as the sponsor of its driving images and as a companion in the struggle for its realization The final chapter turns to an ethic of revolution based on the politics of hope **Strategic Urban Health Communication** Charles C.
