## **Computer Curriculum Maps:**

**Getting Results with Curriculum Mapping** Heidi Hayes Jacobs, 2004-11-15 Curriculum maps are among the simplest yet most effective tools for improving teaching and learning. Because they require people to draw explicit connections between content skills and assessment measures, these maps help ensure that all aspects of a lesson are aligned not only with each other but also with mandated standards and tests. In *Getting Results with Curriculum Mapping*, Heidi Hayes Jacobs and her coauthors offer a wide range of perspectives on how to get the most out of the curriculum mapping process in districts and schools. In addition to detailed examples of maps from schools across the United States, the authors offer concrete advice on such critical issues as: Preparing educators to implement mapping procedures; Using software to create unique mapping databases; Integrating decision-making structures and staff development initiatives through mapping; Helping school communities adjust to new curriculum review processes; and Making mapping an integral part of literacy training. Teachers, administrators, staff developers, and policymakers alike will find this book an essential guide to curriculum mapping and a vital resource for spearheading school improvement efforts. Note: This product listing is for the Adobe Acrobat PDF version of the book. [Curriculum Mapping](#) Kathy Tuchman Glass, 2006-12-07 This resource provides a user-friendly process for creating a curriculum year overview that meets standards. Includes developed curriculum maps, blank templates, and more.

**The Curriculum Mapping Planner** Heidi Hayes Jacobs, Ann Johnson, 2009 This book is designed to help schools deliver effective training in curriculum mapping. Creating and using curriculum maps is easy when this in-depth resource is used in workshops, curriculum means, and professional learning communities. **Teaching Computing in Secondary Schools** William Lau, 2017-09-22 This book provides a step-by-step guide to teaching computing at secondary level. It offers an entire framework for planning and delivering the curriculum and shows you how to create a supportive environment for students in which all can enjoy computing. The focus throughout is on giving students the opportunity to think, program, build, and create with confidence and imagination, transforming them from users to creators of technology. In each chapter, detailed research and teaching theory is combined with resources to aid the practitioner, including case studies, planning templates, and schemes of work that can be easily adapted. The book is split into three key parts: planning, delivery, and leadership and management, and covers topics such as curriculum and assessment design, lesson planning, cognitive science behind learning, computing pedagogy, and instructional principles. Mastery learning in computing, how to develop students' computational thinking, supporting students with special educational needs and disabilities, encouraging more girls to study computing, actions, habits, and routines of effective computing teachers, behaviour management, and developing a strong classroom culture, how to support and lead members of your team. *Teaching Computing in Secondary Schools* is essential reading for trainee and practising teachers and will prove to be an invaluable resource in helping teaching professionals ensure that students acquire a wide range of computing skills which will support them in whatever career they choose. **A Guide to**
