Multimedia Systems Tim Morris, 2012-12-06 What are Multimedia Systems This book is intended to expose you to multimedia in its widest sense The popular understanding of this subject is that it is the integration and delivery of text images and sound usually on a desktop Pc We are all familiar with examples from the extensive range of multimedia titles available on CD ROM These give us a rich set of sensory experiences and perhaps more important we are free to navigate our way through the information as we choose However this is only half of the story since these titles can only deliver information A recent IEEE publication Chen 1997 suggested that multimedia should include all systems that integrate diverse media in standalone or networked applications either for presentation or communication Diverse media implies visual and aural information text static and moving pictures and sound Networking could be realised using intranet or telephone links Presentation systems would imply the multimedia delivery systems with which we are all familiar Communication implies a two way interaction with the computer So as well as transmitting information multimedia systems should also be able to understand and react to information presented to them using the same set of diverse media such as typed text pictures and sound
