A New Concept for Tuning Design Weights in Survey Sampling

Jackknifing in Theory and Practice

Sarjinder Singh, Stephen Sedory, Maria Rueda, Antonio Arcos,
Raghunath Arnab

A New Concept for Tuning Design Weights in Survey Sampling: Jackknifing in Theory and Practice introduces the new concept of tuning design weights in survey sampling by presenting three concepts: calibration, jackknifing, and imputing where needed. This new methodology allows survey statisticians to develop statistical software for analyzing data in a more precisely and friendly way than with existing techniques

KEY FEATURES:

Explains how to calibrate design weights in survey sampling
Discusses how Jackknifing is needed in design weights in survey sampling
Describes how design weights are imputed in survey sampling

CONTENTS INCLUDE:

- Problem of estimation
- Tuning of jackknife estimator
- Model assisted tuning of estimators
- Tuned estimators of finite population variance
- Tuned estimators of correlation coefficient
- Tuning of multicharacter survey estimators
- Tuning of the Horvitz–Thompson estimator
- Tuning in stratified sampling
- Tuning using multiauxiliary information
- A brief review of related work

Best Practices in Lean Manufacturing José Roberto Díaz-Reza, Jorge Luis García Alcaraz, Adrián Salvador Morales García, 2022-03-19 This book reports four structural equation models SEM for quantifying the relationship between the most important lean manufacturing LM practices applied to the manufacturing industry The SEMs are evaluated using 220 responses to a survey applied to manufacturing companies applying LM principles in the production system and are related to distribution and maintenance production process and quality system supply chain and quality and an integrator model The findings identify the most important activities for every LM practices and how they are related These relationship values will help administrators managers engineers to focus their efforts on these most important activities facilitating the decision making process

Survey Sampling Theory and Applications Raghunath Arnab, 2017-03-08 Survey Sampling Theory and Applications offers a comprehensive overview of survey sampling including the basics of sampling theory and practice as well as research based topics and examples of emerging trends The text is useful for basic and advanced survey sampling courses Many other books available for graduate students do not contain material on recent developments in the area of survey sampling The book covers a wide spectrum of topics on the subject including repetitive sampling over two occasions with varying probabilities ranked set sampling Fays method for balanced repeated replications mirror match bootstrap and controlled sampling procedures Many topics discussed here are not available in other text books In each section theories are illustrated with numerical examples At the end of each chapter theoretical as well as numerical exercises are given which can help graduate students Covers a wide spectrum of topics on survey sampling and statistics Serves as an ideal text for graduate students and researchers in survey sampling theory and applications Contains material on recent developments in survey sampling not covered in other books Illustrates theories using numerical examples and exercises

Impact Analysis of Total Productive Maintenance José Roberto Díaz-Reza, Jorge Luis García-Alcaraz, Valeria Martínez-Loya, 2018-10-01 This book present the state of the art in Total Productive Maintainance TPM and its benefits The authors present a survey applied to 368 manufacturing industries in order to determine their level of execution of TPM Then a series of causal models are presented For each model the authors present a measure of the dependency between the critical success factors and the benefits obtained allowing industry

managers to differentiate between essential and non essential activities The content also allows students and academics to obtain a theoretical and empirical basis on the importance of TPM as a lean manufacturing tool in the context of industry 4 0

Leadership and Operational Indexes for Supply Chain Resilience Maribel Mendoza Solis,Jorge Luis García Alcaraz,Juan Manuel Madrid Solórzano,Emilio Jiménez Macías,2023-05-10 This book presents a novel approach for studying the impact of leadership styles on supply chain resilience using a combination of transactional and transformational leadership The book consists of two main sections The first introduces key concepts and provides a framework for understanding the research problem and methodology The second section presents five structural equation models developed and validated using data collected from a survey of managers and engineers in the Mexican Maquiladora Industry These models explore the relationships between key variables such as agility flexibility alertness and efficiency and how they are affected by different leadership styles The findings of this study suggest that a combination of transactional and transformational leadership is highly effective in enhancing resilience and achieving better results during disruptive events Written in a clear and accessible style this book is an essential resource for scholars researchers and practitioners interested in supply chain management leadership and resilience It contributes to the existing literature on these topics and provides practical insights for improving supply chain performance in today s complex and dynamic business environments
