Concepts, Ontologies, and Knowledge Representation Grega Jakus, Veljko Milutinović, Sanida Omerović, Sašo Tomažič, 2013-06-22 Recording knowledge in a common framework that would make it possible to seamlessly share global knowledge remains an important challenge for researchers This brief examines several ideas about the representation of knowledge addressing this challenge A widespread general agreement is followed that states uniform knowledge representation should be achievable by using ontologies populated with concepts A separate chapter is dedicated to each of the three introduced topics following a uniform outline definition organization and use This brief is intended for those who want to get to know the field of knowledge representation quickly or would like to be up to date with current developments in the field It is also useful for those dealing with implementation as examples of numerous operational systems are also given

Advances in Digital Cultural Heritage Marinos Ioannides, João Martins, Roko Žarnić, Veranika Lim, 2018-02-15 This book constitutes the papers of the International Workshop on Analysis in Digital Cultural Heritage 2017 held in Funchal Madeira Portugal in June 2017 The 16 full and 19 poster papers were carefully reviewed and selected from 93 submissions The main objective of the Workshop was to present recent developments and applications of IT technologies for Cultural Heritage preservation namely Demonstration of the advantages of new generation of equipment for mapping digital survey and documentation of heritage assets and sites Presentation of technologies for digitalization optimal documentation and information sharing on Cultural Heritage Tools and procedures for social interaction enhancing fostering awareness and participation Rising of the knowledge level in domain of IT applications for Cultural Heritage preservation Usage of virtual reality for better understanding and learning on Cultural Heritage

Linguistic Perspectives on the Construction of Meaning and Knowledge Elke Diedrichsen, Brian Nolan, 2019-09-24 This book is an exploration of the dimensions of meaning in language from several important perspectives that are of major interest to scholars today bringing together studies from the realms of linguistic pragmatics semantics ontological knowledge engineering and computational linguistics Situated within modern functional cognitive constructional ontological and computational paradigms the analyses here are supported by authentic language data including corpus data from a rich set of languages Context and situation play an important but complex role in meaning elaboration The role of context and situation is elusive and has proved difficult to elucidate with respect to meaning and knowledge representation This volume provides evidence of the nature of the often rapid emergence of meaning in the digital world of the internet social media and Internet memes The use of computational avatars and the rise of human language technologies including big data and digital corpora have made the construction of meaning and human language understanding essential to the work of linguists cognitive scientists and computer scientists who are increasingly working together in collaborative teams to share insights

Structural Analysis of Historical Constructions Rafael Aguilar, Daniel Torrealva, Susana Moreira, Miguel A. Pando, Luis F. Ramos, 2018-08-18 This volume contains the proceedings of

the 11th International Conference on Structural Analysis of Historical Constructions SAHC that was held in Cusco Peru in 2018 It disseminates recent advances in the areas related to the structural analysis of historical and archaeological constructions The challenges faced in this field show that accuracy and robustness of results rely heavily on an interdisciplinary approach where different areas of expertise from managers practitioners and scientists work together Bearing this in mind SAHC 2018 stimulated discussion on the new knowledge developed in the different disciplines involved in analysis conservation retrofit and management of existing constructions This book is organized according to the following topics assessment and intervention of archaeological heritage history of construction and building technology advances in inspection and NDT innovations in field and laboratory testing applied to historical construction and heritage new technologies and techniques risk and vulnerability assessments of heritage for multiple types of hazards repair strengthening and retrofit of historical structures numerical modeling and structural analysis structural health monitoring durability and sustainability management and conservation strategies for heritage structures and interdisciplinary projects and case studies This volume holds particular interest for all the community interested in the challenging task of preserving existing constructions enable great opportunities and also uncover new challenges in the field of structural analysis of historical and archeological constructions

From Collective Beings to Quasi-Systems Gianfranco Minati, Eliano Pessa, 2018-01-29 This book outlines a possible future theoretical perspective for systemics its conceptual morphology and landscape while the Good Old Fashioned Systemics GOFs era is still under way The change from GOFs to future systemics can be represented as shown in the book title by the conceptual change from Collective Beings to Quasi systems With the current advancements problems and approaches occurring in contemporary science systemics are moving beyond the traditional frameworks used in the past From Collective Beings to Coherent Quasi Systems outlines a conceptual morphology and landscape for a new theoretical perspective for systemics introducing the concept of Quasi systems Advances in domains such as theoretical physics philosophy of science cell biology neuroscience experimental economics network science and many others offer new concepts and technical tools to support the creation of a fully transdisciplinary General Theory of Change This circumstance requires a deep reformulation of systemics without forgetting the achievements of established conventions The book is divided into two parts Part I examines classic systemic issues from new theoretical perspectives and approaches A new general unified framework is introduced to help deal with topics such as dynamic structural coherence and Quasi systems This new theoretical framework is compared and contrasted with the traditional approaches Part II focuses on the process of translation into social culture of the theoretical principles models and approaches introduced in Part I This translation is urgent in post industrial societies where emergent processes and problems are still dealt with by using the classical or non systemic knowledge of the industrial phase

Semantic Web-based Intelligent Geospatial Web Services Peng Yue, 2013-04-18 By introducing Semantic Web technologies into geospatial Web services this book addresses the semantic

description of geospatial data and standards based Web services discovery of geospatial data and services and generation of composite services Semantic descriptions for geospatial data services and geoprocessing service chains are structured organized and registered in geospatial catalogue services The ontology based approach helps to improve the recall and precision of data and services discovery Semantics enabled metadata tracking and satisfaction allows analysts to focus on the generation of a geospatial process model rather than spending large amounts of time in data preparation DataType driven service composition and path planning can help to automate a range of knowledge discovery processes in a limited geospatial domain Process planning facilitates the construction of complex services and models for geocomputation A three phase procedure to cover the lifecycle of service chaining and to identify the roles of the methods involved is proposed It includes process modeling process model instantiation and workflow execution The approach is implemented in a prototype system with use cases to demonstrate applicability The objective of the research is to develop the key technologies for an intelligent geospatial knowledge system based on Web services to automate the data discovery and data preprocessing steps in the distributed Web service environment to automate a range of knowledge discovery processes in a limited geospatial domain using the automated construction and execution of service chains and to facilitate the construction of complex services and models for geocomputation

Information-Theoretic Evaluation for Computational Biomedical Ontologies Wyatt Travis Clark,2014-01-09 The development of effective methods for the prediction of ontological annotations is an important goal in computational biology yet evaluating their performance is difficult due to problems caused by the structure of biomedical ontologies and incomplete annotations of genes This work proposes an information theoretic framework to evaluate the performance of computational protein function prediction A Bayesian network is used structured according to the underlying ontology to model the prior probability of a protein s function The concepts of misinformation and remaining uncertainty are then defined that can be seen as analogs of precision and recall Finally semantic distance is proposed as a single statistic for ranking classification models The approach is evaluated by analyzing three protein function predictors of gene ontology terms The work addresses several weaknesses of current metrics and provides valuable insights into the performance of protein function prediction tools

Creating New Medical Ontologies for Image Annotation Liana Stanescu,Dumitru Dan Burdescu,Marius Brezovan,Cristian Gabriel Mihai,2011-12-15 Creating New Medical Ontologies for Image Annotation focuses on the problem of the medical images automatic annotation process which is solved in an original manner by the authors All the steps of this process are described in detail with algorithms experiments and results The original algorithms proposed by authors are compared with other efficient similar algorithms In addition the authors treat the problem of creating ontologies in an automatic way starting from Medical Subject Headings MESH They have presented some efficient and relevant annotation models and also the basics of the annotation model used by the proposed system Cross Media Relevance Models Based on a text query the system will retrieve the images that contain objects described by the keywords

On the Mathematics of Modelling, Metamodelling, Ontologies and Modelling Languages Brian

Henderson-Sellers, 2012-06-13 Computing as a discipline is maturing rapidly. However, with maturity often comes a plethora of subdisciplines which, as time progresses, can become isolationist. The subdisciplines of modelling, metamodelling, ontologies, and modelling languages within software engineering, e.g., have to some degree evolved separately and without any underpinning formalisms. Introducing set theory as a consistent underlying formalism, Brian Henderson-Sellers shows how a coherent framework can be developed that clearly links these four previously separate areas of software engineering. In particular, he shows how the incorporation of a foundational ontology can be beneficial in resolving a number of controversial issues in conceptual modelling, especially with regard to the perceived differences between linguistic metamodelling and ontological metamodelling. An explicit consideration of domain-specific modelling languages is also included in his mathematical analysis of models, metamodels, ontologies, and modelling languages. This encompassing and detailed presentation of the state of the art in modelling approaches mainly aims at researchers in academia and industry. They will find the principled discussion of the various subdisciplines extremely useful, and they may exploit the unifying approach as a starting point for future research.

A Proof Theory for Description Logics Alexandre Rademaker, 2012-05-17

Description Logics (DLs) is a family of formalisms used to represent knowledge of a domain. They are equipped with a formal logic-based semantics. Knowledge representation systems based on description logics provide various inference capabilities that deduce implicit knowledge from the explicitly represented knowledge. A Proof Theory for Description Logics introduces Sequent Calculi and Natural Deduction for some DLs. ALC, ALCQ, Cut elimination, and Normalization are proved for the calculi. The author argues that such systems can improve the extraction of computational content from DLs proofs for explanation purposes.

Reviewing **Concepts Ontologies And Knowledge Representation Springerbriefs In Computer Science**: Unlocking the Spellbinding Force of Linguistics

In a fast-paced world fueled by information and interconnectivity, the spellbinding force of linguistics has acquired newfound prominence. Its capacity to evoke emotions, stimulate contemplation, and stimulate metamorphosis is truly astonishing. Within the pages of "**Concepts Ontologies And Knowledge Representation Springerbriefs In Computer Science**," an enthralling opus penned by a highly acclaimed wordsmith, readers set about an immersive expedition to unravel the intricate significance of language and its indelible imprint on our lives. Throughout this assessment, we shall delve to the book is central motifs, appraise its distinctive narrative style, and gauge its overarching influence on the minds of its readers.

Concepts Ontologies And Knowledge Representation Springerbriefs In Computer Science Introduction

In today's digital age, the availability of Concepts Ontologies And Knowledge Representation Springerbriefs In Computer Science books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Concepts Ontologies And Knowledge Representation Springerbriefs In Computer Science books and manuals for download, along with some

popular platforms that offer these resources. One of the significant advantages of Concepts Ontologies And Knowledge Representation Springerbriefs In Computer Science books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Concepts Ontologies And Knowledge Representation Springerbriefs In Computer Science versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, Concepts Ontologies And Knowledge Representation Springerbriefs In Computer Science books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Concepts Ontologies And Knowledge Representation Springerbriefs In Computer Science books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Concepts Ontologies And Knowledge Representation Springerbriefs In Computer Science books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Concepts Ontologies And Knowledge Representation Springerbriefs In Computer Science books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg,

Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Concepts Ontologies And Knowledge Representation Springerbriefs In Computer Science books and manuals for download and embark on your journey of knowledge?
