Management of Cardiovascular Disease in Women Hanna Z. Mieszczanska, Gladys P. Velarde, 2014-03-24 Cardiovascular disease is the leading cause of death in women in the US with more women dying from heart disease than men Women may have different presentation from men and often need a different approach to diagnosis and treatment There are also unique topics of management of heart disease in women including issues during pregnancy lactation and menopause Many different health care providers as well as cardiologists are involved in treating these patients A manual reviewing diagnosis and treatment of cardiac disease in women would help providers without specific cardiology training to deliver care with greater efficiency A practical and comprehensive guide geared towards these providers would be a highly practical and valuable resource that would be utilized in everyday practice in offices that include urban clinics general medicine offices obstetrics and gynecology offices as well as in the surgical subspecialties This book will be a highly practical resource that can be directly applied to the issues that arise in everyday practice There is no available book on the market that focuses on a broader approach to cardiac disease in women or focuses on non cardiology providers and their trainees who have the need to know more about treatment of cardiovascular disease in women
