blended cements admixtures additives including properties of aggregates and their influence The second part of the book highlights the principal causes of concrete deterioration along with protective measures resulting from incorrect selection of constituent materials poor construction methods external factors chemical attack corrosion problems hot and cold weather effects and the various errors in designing and detailing Featuring an extensive bibliography of the highly adopted standards as well as manuals and journals critical to the construction industry at the end of each chapter the volume offers readers an advanced understanding of the theory and practical application of concrete technology and international standards in North America and Britain Addresses concrete technology as well as concrete construction practices meeting national and international standards Maximizes readers understanding of the principal causes of concrete deterioration along with protective measures Facilitates readers grasp of different nomenclature used for the same materials in different parts of the world Features suitable tables charts and diagrams that illustrate and organize useful information Explains sustainable concrete doctrine and how to achieve it meeting green concrete building requirements Provides a glossary conversion factors and examples of concrete mix design The Indian Concrete Journal ,1993

REPAIR AND REHABILITATION OF CONCRETE STRUCTURES MODI, POONAM I., PATEL, CHIRAG N.,2015-12-01 The field of Concrete Repair and Rehabilitation is gaining importance in view of its positive impacts in terms of socio economic benefits and environmental sustainability Due to growing importance of this field many engineering colleges have included the subject of concrete repair and rehabilitation in the senior undergraduate and postgraduate course curriculums of civil engineering This book is an earnest attempt to help students of civil engineering in enhancing their understanding and awareness about critical elements of repair and rehabilitation of concrete structure The content is organised in such a way that it fulfils the academic needs of the students This text attempts to dovetail all important aspects such as causes of distress assessment and evaluation of deterioration techniques for repair and rehabilitation along with selection of repair and rehabilitation materials and other important aspects related to preventive maintenance and rehabilitation structural safety measures The primary objective of this textbook is to guide students to Understand the underlying causes and types of deterioration in concrete structure Learn about the field and laboratory testing methods available to evaluate the level of deterioration Get well acquainted with options of repair materials and techniques available to address different types of distress in concrete structure Grasp the knowledge of available techniques and their application for strengthening existing structural systems **Concrete Technology: Theory and Practice** Sasankasekhar Mandal,Vishwajit Anand,Sushil Kumar Agarwala,2025-06-01

Advances in Structural Engineering Vasant Matsagar,2014-12-12 The book presents research papers presented by academicians researchers and practicing structural engineers from India and abroad in the recently held Structural Engineering Convention SEC 2014 at Indian Institute of Technology Delhi during 22-24 December 2014 The book is divided into three volumes and encompasses multidisciplinary areas within structural engineering such as earthquake engineering

and structural dynamics structural mechanics finite element methods structural vibration control advanced cementitious and composite materials bridge engineering and soil structure interaction Advances in Structural Engineering is a useful reference material for structural engineering fraternity including undergraduate and postgraduate students academicians researchers and practicing engineers

Advanced Materials and Sustainability in Civil Engineering Kiran Kumar Polaju, 2021-10-25 This book discusses the detailed concepts of concrete and its development with pros and cons Besides the significance of various industrial wastes as partial replacements with concrete ingredients such as cement and aggregates are discussed The creation of cement contributes to around 7% of carbon emissions into the atmosphere leading to greenhouse effect and global warming Similarly the wastes generated from various industries such as thermal steel ceramic marble paper and etc shows the impact on atmosphere and leads to air pollution and land pollution Thus it is essential to focus on these wastes to use them in a profitable manner without compromising the current needs This book discusses a few examples on studies of using various industry wastes as partial replacement of cement in concrete

High Performance Structures and Materials VI Willy Patrick Wilde, C. A. Brebbia, Santiago Hernández, 2012 Containing the edited papers presented at the Sixth International Conference on High Performance Structures and Materials High Performance Structures and Materials VI addresses the issues involved with advanced types of structures particularly those based on new concepts or new materials Contributions will highlight the latest developments in design optimisation manufacturing and experimentation in these areas The use of novel materials and new structural concepts nowadays is not restricted to highly technical areas like aerospace aeronautical applications or the automotive industry but affects all engineering fields including those such as civil engineering and architecture Most high performance structures require the development of a generation of new materials which can more easily resist a range of external stimuli or react in a non conventional manner The book will cover such topics as Composite materials and structures Lightweight structures Nanocomposites High performance concretes Concrete fibres Automotive composites Steel structures Natural fibre composites Timber structures Material characterisation Experiments and numerical analysis Damage and fracture mechanics Computational intelligence Adaptable and mobile structures Environmentally friendly structures
